For the Love of Teaching Ira D. Shull, 1998 Multicultural perspectives abound in these interview portraits of teachers from every state and setting. Any stereotypes readers may have about teachers will go right out the window as they enjoy these anecdotes that reveal the real reasons teachers teach. Seven themes emerge: life, work, connection, change, surprise, adventure, fulfillment and love. Represented in fifty-four interviews with teachers are all fifty states plus Puerto Rico as a U.S. commonwealth, all grades, urban, suburban and rural areas, private and public schools and alternative settings such as military and prison classrooms. The author's questions remain hidden as the teachers in their own separate voices reflect on their work. The author notes: By listening to the voices of those who would teach us we come to understand not only what learning means but what living means. For it is through our teachers that we begin to discover who we are as human beings and what we want to be as a society. The Foreword was written by Eric Oddleifson, a successful businessman who is also active in efforts to improve American schools. He writes: This book describes the type of person we need to attract to the teaching profession as it gives voice to the enthusiasm, the passion, the commitment that invades his or her being. There can be no finer calling requiring the clearest demonstration of moral and ethical behavior.

Resources in Education, 1996-07 *Overcoming Inequalities in Schools and Learning Communities: Innovative Education for a New Century* Rocio Garcia-Carrion, Roseli Rodrigues De Mello, Arnetha F. Ball, 2020-03-24. Educational inequalities have strongly impacted disadvantaged and underserved populations such as indigenous, Roma, migrant children, students with disabilities and those affected by poverty. A wide array of research has contributed to explaining the mechanisms and effects of inequalities in the achievement patterns, dropout rates, disengagement in the school experiences of children and youth traditionally excluded. Research also suggests the negative consequences for child development including cognitive, language and social emotional functioning of poverty and lack of quality education in the early years. Consequently, the current unequal access to optimal learning environments for every single child to succeed in

education and to have a better life perpetuates the exclusion and neglects the right to education for those minorities. This Research Topic aims at moving beyond causes and shed light upon effective solutions by providing successful pathways for integration and inclusion of the learners most heavily affected. Scholars worldwide are looking for successful actions with children, youth and communities of learners historically underserved to overcome educational and social exclusion. These transformative approaches go beyond the deficit thinking and are grounded in theories, empirical evidence and multidisciplinary interventions oriented towards achieving social impact, which refers to the extent to which those actions have contributed to improve a societal challenge. The international network of Schools as Learning Communities is advancing knowledge on deepening and expanding the impact of what has been defined as Successful Educational Actions (SEAs) that is, those interventions that improve students' achievement and social cohesion and inclusion in many diverse contexts regardless the socioeconomic, national and cultural environment of schools. Drawing on the evidence generated by this network of researchers to address the global challenge of inequality by studying educational actions oriented towards achieving social impact and potentially transferrable to other contexts, this Research Topic aims at deepening on this approach. In short, our purpose is that the contributions included in this Research Topic contribute to reduce educational and social inequalities and especially benefit those populations most in need. Understanding Montessori: A Guide for Parents will help parents understand the stages of childhood growth and learning and how Montessori education meets each child's learning needs. Understanding Montessori draws on the author's over thirty years of working with children to explain in simple language what neuropsychologists are now finding that children learn faster and more easily in a properly prepared Montessori classroom than in traditional school settings. Montessori classrooms the world over have proven that when implemented faithfully Dr Montessori's philosophy works for children of all abilities, all socio-economic circumstances and all cultures. Montessori education offers an unmatched complement of principles, methods and materials that develop a child's mind like no other educational method. Montessori education is innovative, respectful of the child, time tested, developmentally exacting and research supported. Beautiful Montessori classrooms include the outdoors and aid children in valuing and caring for the wonders of our Earth. When parents understand the mightiness of Montessori education for their children and their families, parents find a way to create authentic Montessori education for their children, be it private, public, magnet, charter, parochial or home schooling. Too many grandparents have made the comment I wish I had known about Montessori when my children were young. Perhaps the next generation of grandparents will say Thank goodness we found Montessori education for our children. And that made all the difference. [Independent School Guide](#) Lois H. elementary school years you spent sitting at your desk and listening to your teacher most of the day While this school method is still the most popular to date another lesser known school method is becoming increasingly popular among parents and educators The Montessori school method has become very popular in recent years However this type of school uses a method very different from the conservative one and its application is therefore still somewhat controversial Dr Maria Montessori was a professor of anthropology in Rome in the early twentieth century Maria Montessori was heavily influenced by Friedrich Froebel who invented the nursery school and Johann Henrich Pestalozzi and firmly believed that children learned through activities He invented a new philosophy on raising children Maria Montessori's philosophy and methodology teach that children learn more in a stimulating environment According to her philosophy a teacher is more of a keeper of the environment and helps to create one that facilitates the self guided learning process for children Today many teachers and parents strongly follow this type of education as evidenced by the growing number of Montessori schools in the world What are the differences between Montessori schools and traditional schools In traditional classrooms children with children of the same age are grouped together and follow exactly the same lessons participate in the same activities and work Montessori classrooms are very different Typically a Montessori classroom is designed for children of different ages and follows an open concept style with different work areas Lessons are generally held in small groups of children while other children work or study alone This concept allows children to expand their individual and social development In a traditional school the teacher acts as the one who provides all the information offered by the school and mainly uses books and a rigorous methodology In a Montessori school the teacher acts as a guide and often mixes conventional teaching aids but also other materials such as stories and objects In Montessori schools students often take responsibility for planning their work and time Montessori students strong artists While many parents firmly believe in the Montessori method this school method is still quite unknown and often controversial However it has been shown by psychologists in the United States that the children of the Montessori schools not only received an excellent education but in some areas even exceeded the children who attended traditional schools Furthermore students attending Montessori schools seemed to outperform others when it came to social skills and behaviors This book covers the following topics Who was Montessori Creating the right environment Organizing the spaces at home Practical activities Sensorial activities Language activities Self discovering Conflict resolution temper tantrum Montessori parenting habit Socialization How to unleash the child's creative potential And much more So what are you waiting for Learn more about Montessori method now
