## **Resume Template Walking Workout This Month:**

*Client-Centered Exercise Prescription* John C. Griffin, 2015-01-21 Client Centered Exercise Prescription Third Edition With Web Resource emphasizes a personalized approach to exercise in which unique programs meet the interests and needs of individual clients. This resource will help you to prescribe exercise and guide clients in adopting, enjoying, and maintaining active lifestyles. Client Centered Exercise Prescription Third Edition expands the role of the fitness professional from simple exercise prescription to include activity counseling, design modification, exercise demonstration, functionally integrated exercise, injury prevention, and follow up monitoring for a variety of clients. Central to the book are seven client centered models for each major fitness component that serve as a template of options for each decision in the prescription process: activity counseling, musculoskeletal exercise design, exercise demonstration, cardiovascular exercise prescription, resistance training, prescription, muscle balance and flexibility prescription, and weight management prescription. The text explains the vital role that functionally integrated exercise plays in improving performance and maintaining musculoskeletal health and teaches how to recognize muscle imbalance and prevent complications. Fitness professionals will learn to make informed client centered decisions and address the following issues: Establishing rapport and increasing adherence by prescribing exercise programs that match clients' desires, needs, and lifestyles; Understanding clients' unique psychological needs and using that information to keep them motivated; Monitoring clients' needs both as they are originally presented and as they evolve over time; Applying strategies for treating and preventing overuse injuries so that clients avoid injury and frustration, thereby avoiding withdrawal from the program; Addressing the unique considerations of aging clients, including musculoskeletal conditions and functional mobility. The third edition of Client Centered Exercise Prescription retains the client centered approach of previous editions, offering simulated initial interviews with clients, teaching cues for demonstration sample sessions, and sample counseling dialogue. The text also features numerous updates, More than 40 reproducible forms included in the text and duplicated in printable format in the web resource that can be shared with clients. Applied exercise prescription worksheets that facilitate the flow from the prescription models to the prescription card. Three new chapters on exercise prescription for aging adults that offer specific exercise recommendations for this growing demographic. Expanded sections on applied nutrition, reliable field tests, safety and referrals, and a unique biomechanical approach to exercise modifications and functional progressions. Five new case studies and other updated case studies that allow you to grasp how the material may be used in practice. Theory to Application sidebars, numerous photos and chapter summaries that will engage you and help you find the most relevant information. Using reliable field tests, practical nutrition guidelines, and applied exercise physiology concepts, this text will help both professionals and students better serve their current and future clients. Candidates preparing for certification exams including the Canadian Society for Exercise Physiology Certified Personal Trainer (CSEP) CPT exam will find comprehensive treatment of the theory and applications.

covering the competencies required before entering the field Practical examples applied models and scientific knowledge also make the text accessible to undergraduate students in fitness exercise science and health promotion programs

**Therapeutic Exercise for Children with Developmental Disabilities** Barbara H. Connolly, Patricia

Montgomery, 2024-06-01 Therapeutic Exercise for Children With Developmental Disabilities has been expanded and updated to include everything a student or professional needs to know when working with children with developmental disabilities Continuing the emphasis on evidence based practice from the previous editions this comprehensive Fourth Edition enhances critical thinking and evaluation skills Throughout the course of the text Drs Barbara H Connolly and Patricia C Montgomery present case studies of 5 children with various developmental disabilities to bring a problem solving approach to each individual chapter topic The case studies include 2 two children with cerebral palsy GMFCS Levels I and V a child with myelomeningocele a child with Down syndrome and a child with developmental coordination disorder and attention deficit hyperactivity disorder Each chapter s examination evaluation and intervention recommendations are accompanied by specific treatment objectives and therapeutic activities plus a companion website with 17 videos which contains 90 minutes of content to illustrate concepts Recent research and clinical recommendations as well as related references are also provided in each chapter This Fourth Edition utilizes the American Physical Therapy Association s Guide to Physical Therapist Practice 3.0 and the World Health Organization s International Classification of Functioning Disability and Health Children and Youth as its framework The focus of the chapters is on children s participation and empowerment rather than body function and structure Examples of new and updated topics in the Fourth Edition Practice in the NICU Early mobility strategies Communication strategies with children and families Aquatic therapy Upper extremity constraint induced therapy Mirror therapy Lower extremity treadmill training With helpful videos informative figures and compelling case studies Therapeutic Exercise for Children With Developmental Disabilities Fourth Edition is the perfect resource for both students and practicing clinicians
