An integrated part of the Microsoft business intelligence framework, Reporting Services combines the data management capabilities of SQL Server and Microsoft Windows Server with familiar and powerful Microsoft Office System applications to deliver real-time information to support daily operations and drive decisions. Microsoft SQL Server 2005 Reporting Services will help you understand Reporting Services from various perspectives. How it fits business scenarios. How to install and configure Reporting Services. Reporting Services components. Developing reports. As you progress to advanced user status, you will enjoy the chapter about accessing Reporting Services programmatically and extending Reporting Services, and you will be able to use this book as a convenient reference. [Professional SQL Server Reporting Services](#) Paul Turley, Todd Bryant, James Counihan, George McKee, Dave DuVarney, 2004-05-10 What is this book about? SQL Server Reporting Services is the customizable reporting solution for report designers and programmers. This hands-on guide will get you up to speed quickly. You can create powerful reports without programming knowledge and extend reporting solutions using VB, C, and ASP.NET. Packed with detailed examples of building reports, designing report solutions, and developing deployment strategies for interacting with various platforms, this book prepares you to take full advantage of a revolutionary new tool. What does this book cover? Here are just some of the things you'll learn in this book: Details of programming reports and report scripting. Advanced report design, including drill-down reports, nested lists, drill-through links, and dynamic content. How to manage reports using Report Manager or program code. High-level strategies for business support systems. Rendering reports using .NET code, .NET IO namespace classes, and URL rendering. Deployment strategies to handle hardware, software, and platform considerations, licensing issues, and scaling options. Who is this book for? This book is for developers and report designers using VB, C, and ASP.NET who need to tie into SQL Server to build customized reports or to integrate reports into Windows or Web-based applications.
