web although a system at equilibrium appears static on a macroscopic level it is important to remember that the forward and the reverse reactions continue to occur a reaction at equilibrium exists in a steady state in which the rate at which a species

forms equals the rate at which it is consumed

*reversible reaction wikipedia* - Jan 08 2023

web a reversible reaction is a reaction in which the conversion of reactants to products and the conversion of products to reactants occur simultaneously 1 a and b can react to form c and d or in the reverse reaction c and d can react to form a and b this is distinct from a reversible process in thermodynamics

web all reactions tend towards a state of chemical equilibrium the point at which both the forward process and the reverse process are taking place at the same rate since the forward and reverse rates are equal the concentrations of the reactants

and products are constant at equilibrium

**equilibrium in reversible chemical reactions** jack westin - Jun 01 2022

web in a chemical equilibrium the forward and reverse reactions occur at equal rates and the concentrations of products and reactants remain constant law of mass action the law of mass action links the rate of a chemical reaction as proportional to the concentrations of the reactants and products in a chemical reaction for a chemical reaction
