**The Science of Monsters** Matt Kaplan, 2013-03-21 Modern audiences do not find dragons frightening Fascinating as mythical creatures yes but terrifying no Yet present them with a story about a virus that can kill a healthy adult in hours and they will have nightmares for weeks The difference between the two is believability Monsters are at their most frightening when they carry characteristics that tie them to the real world in some way Preposterous as they might seem today dragons were no different in ancient times Humans long ago stumbled upon skeletons that had sharp teeth and talon-like claws These fossils were real and some were frighteningly large Those who looked at them could only guess at how dangerous the animals that they belonged to must have been From such interactions dragons were born Yet in spite of ample physical evidence that dragons existed none were ever seen in the flesh Dragon bones were ultimately proven to be the bones of huge predatory dinosaurs like *Tyrannosaurus Rex* but before the mystery was solved they were the makings of frightening beasts that managed to evade human sight by lurking deep within the shadows of the wild *The Science of Monsters* will explore monsters that have haunted humanity throughout the ages from Medusa to sea serpents giants and vampires In each chapter Kaplan uses scientific principles current research and his thorough knowledge of the natural world to explain why specific monsters

came to be and what it was about them that was so terrifying to the people who brought them to life      **Monster Diary**

Nick Redfern, Nicholas Redfern, 2013-08 MONSTER DIARY is the latest saga in Nick Redfern's ongoing series of worldwide road trips in search of strange creatures and terrifying beasts. In this transatlantic trek Redfern is hot on the trail of a Mothman-like creature in Wisconsin, giant eels that lurk in the canals of Birmingham, England, a spectral mammoth and a ghostly big cat in American woods, Bigfoot in New Mexico, a Chupacabras in the wilds of Oklahoma, vampire-like beasts roaming the valleys of Wales, and California's very own shape-shifting Skinwalkers. MONSTER DIARY reveals that many of the unknown animals of our planet are not all they seem to be. They may appear to be flesh and blood creatures, but is that what they really are? Redfern sets out to prove that the true nature of the fearsome creatures that dwell in dark and shadowy woods atop imposing mountainous peaks and within the depths of murky lakes and rivers can only be understood with a knowledge of ancient rituals designed to conjure up foul life forms from some terrible realm: ominous sacrificial ceremonies undertaken in the dead of night and disturbing occult rites. Monsters do exist. Monsters are among us. But they are not what you probably think there are.

About the Author: NICK REDFERN works full time as an author, lecturer, and journalist. He focuses upon a wide range of unsolved mysteries, including Bigfoot, UFOs, the Loch Ness Monster, alien encounters, and government conspiracies. He writes for UFO Magazine, Mysterious Universe, Fate, and Fortean Times. His many previous books include *Final Events*, *On the Trail of the Saucer Spies*, *There's Something in the Woods*, and *Science Fiction Secrets*. Nick has appeared on numerous television shows, including Fox News, VH1's *Legend Hunters*, the BBC's *Out of this World*, History Channel's *America's Book of Secrets*, *Ancient Aliens*, *MonsterQuest*, and *UFO Hunters*, National Geographic Channel's *The Truth About UFOs* and *Paranatural*, and SyFy Channel's *Proof Positive*. **Monster** Christopher Pike, 1992 Another hit from the New York Times bestselling author of *Bury Me Deep*, Mary Carlson had wanted to kill more than the two people she blew away with a shotgun at the party. And when her best friend Angela asks her why, Mary responds, "Because they're no longer human." At first Angela thinks she's crazy. But soon she discovers a horror so unimaginable she wonders if she should have let Mary go on killing.      Monster in the Box
