Adaptive Implementation Ryoko Yamaguchi,2017-07-21 After decades spent pondering basic questions about adopting or implementing best practices in education educators have assembled a canon of evidence based strategies and programs that should consistently produce good outcomes So why is the work of educating students still such challenging work for so many The best most skilled educators adapt programs every day to meet the changing needs of their students One size does

not fit all and one textbook teaching strategy or program will never meet the needs of all teachers and learners Adaptive Implementation Navigating the School Improvement Landscape focuses on how practitioners and researchers together continue to improve their craft by systematically collecting data on adaptations testing them out and figuring out what works We provide a framework for building an adaptive implementation process in education with tools and templates for practitioners to use In the end we hope that this book sparks a dialogue among educators as they continue to create adaptive implementation processes that work for their context **Congressional Record** United States.
