firm makes inventory and supply decisions in sharing economy supply is crowdsourced and can be modulated by a platform
 The matching supply with demand process in a sharing economy requires novel perspectives and tools to address challenges
 and identify opportunities The book is comprised of 20 chapters that are divided into four parts The first part explores the
 general impact of sharing economy on the production consumption and society The second part explores the intermediary
 role of a sharing platform that matches crowdsourced supply with demand The third part investigates the crowdsourcing
 management on a sharing platform and the fourth part is dedicated to context based operational problems of popular sharing
 economy applications While sharing economy is becoming omnipresence the operations management OM research
 community has begun to explore and examine different business models in the transportation healthcare financial
 accommodation and sourcing sectors This book presents a collection of the state of the art research work conducted by a
 group of world leading OM researchers in this area Not only does this book cover a wide range of business models arising
 from the sharing economy but it also showcases different modeling frameworks and research methods that cannot be missed
 Ultimately this book is a tour de force informative and insightful Christopher S Tang Distinguished Professor and Edward

 Economic Update, October 2023** Weltbank, World Bank, 2023-10 Economic activity in much of developing East Asia and
 Pacific EAP other than several Pacific Island Countries has recovered from the succession of shocks since 2020 but is now
 slowing down Private consumption and the recovery of tourism had sustained growth in the region but is running out of
 steam Slowing global growth is leading to a contraction in exports Public investment and private investment also remain low
 in much of the region Most governments in the region are projected to consolidate fiscally in 2023 The revival of growth in
 the region will depend crucially on the state of the services sectors Even though manufacturing has powered EAP
 development services already account for more than half of value added and employment A digital revolution is leading to
 structural change within all services sectors with the combination of new domestic platform based services and more
 internationally tradable services boosting productivity Harnessing the digital revolution for inclusive economic growth
 requires deeper services reforms 14th International Conference on Theory and Application of Fuzzy Systems and Soft
