Student-Centered Strategies in Online Adult Learning Environments Fitzgerald, Carlton J., Laurian-Fitzgerald,
Simona, Popa, Carmen, 2018-06-08 As traditional classroom settings are transitioning to online environments teachers now
face the challenge of using this medium to promote effective learning strategies especially when teaching older age groups
Because adult learners bring a different set of understandings and skills to education than younger students such as more job
and life experiences the one size fits all approach to teaching does not work thus pushing educators to create a student
centered approach for each learner The Handbook of Research on Student Centered Strategies in Online Adult Learning
Environments is an important resource providing readers with multiple perspectives to approach issues often associated with
adult learners in an online environment This publication highlights current research on topics including but not limited to
online competency based education nontraditional adult learners virtual classrooms in public universities and teacher
training for online education This book is a vital reference for online trainers adult educators university administrators
researchers and other academic professionals looking for emerging information on utilizing online classrooms and

Anthology on Adult Education and the Development of Lifelong Learners Management Association, Information
Resources, 2021-03-19 Whether it is earning a GED a particular skill or technical topic for a career taking classes of interest
or even returning to begin a degree program or completing it adult learning encompasses those beyond the traditional
university age seeking out education This type of education could be considered non traditional as it goes beyond the typical
educational path and develops learners that are self initiated and focused on personal development in the form of gaining
some sort of education Essentially it is a voluntary choice of learning throughout life for personal and professional
development While there is often a large focus towards K 12 and higher education it is important that research also focuses
on the developing trends technologies and techniques for providing adult education along with understanding lifelong
learners choices developments and needs The Research Anthology on Adult Education and the Development of Lifelong
Learners focuses specifically on adult education and the best practices services and educational environments and methods
for both the teaching and learning of adults This spans further into the understanding of what it means to be a lifelong
learner and how to develop adults who want to voluntarily contribute to their own development by enhancing their education
level or knowledge of certain topics This book is essential for teachers and professors course instructors business
professionals school administrators practitioners researchers academicians and students interested in the latest
