Spelling Rebecca Treiman,2013-06-29 are the findings that Wade Woolley and Siegel obtained when they studied children for whom English was a second language Although the second language speakers performed more poorly than the native speakers on tests of syntactic knowledge phoneme deletion and pseudoword repetition the second language speakers were not worse than the native speakers in spelling These results suggest that even if children have not fully mastered the sound system of their second language they need not be disadvantaged in spelling it The findings appear to pose a challenge to views of reading and spelling that place primary emphasis on phonology The Muter and Snowling study together with the Nunes Bryant and Bindman study broadens the focus by examining aspects of spelling beyond phonology Muter and Snow ling in their longitudinal study of British school children examined the degree to which various linguistic skills measured between the ages of 4 and 6 predicted spelling ability at age 9 The results support the idea that phonological skill plays an important role in spelling development and further suggest that awareness of phonemes is more

strongly related to spelling ability than awareness of rimes In addition grammatical awareness appears to predict spelling skill Children who are able to reflect on meaning relationships among words may be in a position to understand how this information is represented in English spelling Assessment for Teaching Patrick Griffin,2014-02-14 Assessment for Teaching is a comprehensive and practical introduction to assessment and learning in primary and secondary school settings This book treats assessment as a source of data that informs teaching strategies It replaces a deficit model of assessment with a development model a framework which recognises the importance of identifying what the student is ready to learn The book also promotes collaboration between teachers in professional learning teams encouraging the sharing of assessment data and team based interpretation to improve student outcomes and to plan goals for students based on a development scale Each chapter contains an exercise for applying the course content to classroom practice a response template for the exercise guidelines on assessing the value of the exercise in a professional learning team a short test for participants to cross check their understanding of the course content This is an essential resource for both pre service and in service teachers
