Deep Learning Stephane Tuffery,2022-11-14 DEEP LEARNING A concise and practical exploration of key topics and applications in data science In Deep Learning From Big Data to Artificial Intelligence with R expert researcher Dr St phane Tuff ry delivers an insightful discussion of the applications of deep learning and big data that focuses on practical instructions on various software tools and deep learning methods relying on three major libraries MXNet PyTorch and Keras TensorFlow In the book numerous up to date examples are combined with key topics relevant to modern data scientists including processing optimization neural network applications natural language processing and image recognition This is a thoroughly revised and updated edition of a book originally released in French with new examples and methods included throughout Classroom tested and intuitively organized Deep Learning From Big Data to Artificial Intelligence with R offers complimentary access to a companion website that provides R and Python source code for the examples offered in the book Readers will also find A thorough introduction to practical deep learning techniques with explanations and examples for various programming libraries Comprehensive explorations of a variety of applications for deep learning including image recognition and natural language processing Discussions of the theory of deep learning neural networks and artificial intelligence linked to concrete techniques and strategies commonly used to solve real world problems Perfect for graduate students studying data science big data deep learning and artificial intelligence Deep Learning From Big Data to Artificial Intelligence with R will also earn a place in the libraries of data science researchers and practicing data scientists

Accelerate Model Training with PyTorch 2.X Maicon Melo Alves,2024-04-30 Dramatically accelerate the building process of complex models using PyTorch to extract the best performance from any computing environment Key Features Reduce the model building time by applying optimization techniques and approaches Harness the computing power of multiple devices and machines to boost the training process Focus on model quality by quickly evaluating different model configurations Purchase of the print or Kindle book includes a free PDF eBook Book DescriptionThis book written by an HPC expert with over 25 years of experience guides you through enhancing model training performance using PyTorch Here you ll learn how model complexity impacts training time and discover performance tuning levels to expedite the process as well as utilize PyTorch features specialized libraries and efficient data pipelines to optimize training on CPUs and accelerators You ll also reduce model complexity adopt mixed precision and harness the power of multicore systems and multi GPU environments for distributed training By the end you ll be equipped with techniques and strategies to speed up training and focus on building stunning models What you will learn Compile the model to train it faster Use specialized libraries to optimize the training on the CPU Build a data pipeline to boost GPU execution Simplify the model through pruning and compression techniques Adopt automatic mixed precision without penalizing the model s accuracy Distribute the training step across multiple machines and devices Who this book is for This book is for intermediate level data scientists who want to learn how to leverage PyTorch to

speed up the training process of their machine learning models by employing a set of optimization strategies and techniques To make the most of this book familiarity with basic concepts of machine learning PyTorch and Python is essential However there is no obligation to have a prior understanding of distributed computing accelerators or multicore processors

Computer HardWare Pavel Bartoš,1991 When writing this book we tried to create a material that would serve as a comprehensive guide to the world of computer hardware Our goal was to offer readers not only theoretical knowledge but also practical skills that can be used in real situations We believe that this textbook will be useful not only for high school students but also for the general public who are interested in technologies and their applications When creating the content we were based on many years of experience in education and practice in the field of information technology We tried to cover a wide range of topics from basic components of a personal computer to more complex issues such as overclocking microprocessors or configuring RAID systems Each topic is supplemented with practical examples and exercises that help to better understand the given issue **ECCWS 2023 22nd European Conference on Cyber Warfare and Security** Antonios Andreatos,Christos Douligeris,2023-06-22 *Build a Large Language Model (From Scratch)* Sebastian Raschka,2024-10-29 Learn how to create train and tweak large language models LLMs by building one from the ground up In Build a Large Language Model from Scratch bestselling author Sebastian Raschka guides you step by step through creating your own LLM Each stage is explained with clear text diagrams and examples You ll go from the initial design and creation to pretraining on a general corpus and on to fine tuning for specific tasks Build a Large Language Model from Scratch teaches you how to Plan and code all the parts of an LLM Prepare a dataset suitable for LLM training Fine tune LLMs for text classification and with your own data Use human feedback to ensure your LLM follows instructions Load pretrained weights into an LLM Build a Large Language Model from Scratch takes you inside the AI black box to tinker with the internal systems that power generative AI As you work through each key stage of LLM creation you ll develop an in depth understanding of how LLMs work their limitations and their customization methods Your LLM can be developed on an ordinary laptop and used as your own personal assistant About the technology Physicist Richard P Feynman reportedly said I don t understand anything I can t build Based on this same powerful principle bestselling author Sebastian Raschka guides you step by step as you build a GPT style LLM that you can run on your laptop This is an engaging book that covers each stage of the process from planning and coding to training and fine tuning About the book Build a Large Language Model From Scratch is a practical and eminently satisfying hands on journey into the foundations of generative AI Without relying on any existing LLM libraries you ll code a base model evolve it into a text classifier and ultimately create a chatbot that can follow your conversational instructions And you ll really understand it because you built it yourself What s inside Plan and code an LLM comparable to GPT 2 Load pretrained weights Construct a complete training pipeline Fine tune your LLM for text
