Making a Metaverse That Matters Wagner James Au, 2023-05-16 An up close account from the world s first metaverse embedded reporter In Making a Metaverse That Matters From Snow Crash Second Life to A Virtual World Worth Fighting For the

celebrated author of The Making of Second Life and Game Design Secrets Wagner James Au delivers an engrossing exploration of how nascent metaverse platforms have already captured the imagination of millions. Featuring powerful stories and dozens of incisive interviews with insiders including Metaverse creator Neal Stephenson himself, the author uses his unique grassroots level perspective as the first reporter embedded in a metaverse platform. Readers will learn about How to understand and define the Metaverse and cut through the many myths and misconceptions around it. A behind the scenes account of launching Second Life, the first metaverse platform to achieve mainstream awareness, and what its many controversies teach us. Where current platforms Meta, Roblox, Fortnite, VRChat, and Lamina1, Neal Stephenson's own metaverse startup, fit in the ecosystem. How to address the many dangers inherent in the Metaverse before it becomes central to the Internet. Perfect for XR industry members and indie creatives. Making a Metaverse That Matters is also for tech professionals, virtual world communities, and anyone interested in the future of culture and commerce. [Anatomy of Game Design](#) Tom Smith, 2024-10-31. People have played games forever, but it's only in the past few decades that people really started thinking about what games are, how they work, and how to make them better. Anatomy of Game Design takes some of the most popular and beloved games of all time and dissects them to see what makes them tick. By breaking down the systems and content of each game, the underlying systems of game design are laid bare. Eight games are analyzed, including Settlers of Catan, Centipede, Candy Crush, Saga, Papers Please, Magic: The Gathering, and more, each representing a different genre or era of game design. Each game is discussed in detail using the same methods for each game: What are the verbs of the game that give the player agency? How do those verbs fit together to form a core loop that makes the game engaging? What are the systems that power the gameplay? What is the larger flow that makes the game interesting over and over again? Each game is then used as an example to tie back to one or more larger topics in game design, such as systems design, randomness, monetization, game theory, and iterative approaches to game development. Key Features: Uses well-known games to provide specific discrete examples of broader game design theory. Discusses eight popular games using the same methodology to allow comparison of different types of games. Includes both high-level theory and academic perspective and practical real-world guidance from a working game designer who has created these games for commercial release. Provides clear direction for deeper inquiry into game design or related fields such as psychology, anthropology, game development, or systems thinking. [Virtual Natives](#) Catherine D. Henry, Leslie Shannon, 2023-09-06. The eclipse of Digital Natives and the dawn of virtual culture: how Gen A-Z are radically redefining the future of work, play, economics, and social life. We're living through what is arguably one of the most exciting, confusing, and powerful social moments in the history of humanity: the shift from the Digital Age to the Virtual Age. Don't Use Your Words! Jane Juffer,2019-05-28 How children are taught to control their feelings and how they resist this emotional management through cultural production Today even young kids talk to each other across social media by referencing memes songs and movements constructing a common vernacular that resists parental educational and media imperatives to name their feelings and thus control their bodies Over the past two decades children s television programming has provided a therapeutic site for the processing of emotions such as anger but in doing so has enforced normative structures of feeling that Jane Juffer argues weaken the intensity and range of children s affective experiences Don t Use Your Words seeks to challenge those norms highlighting the ways that kids express their feelings through cultural productions including drawings fan art memes YouTube videos dance moves and conversations while gaming online Focusing on kids between ages five and nine Don t Use Your Words situates these productions in specific contexts including immigration policy referenced in drawings by Central American children just released from detention centers and electoral politics as contested in kids artwork expressing their anger at Trump s victory Taking issue with the mainstream tendency to speak on behalf of children Juffer argues that kids have the agency to answer for themselves what does it feel like to be a kid
