## Openkore Macro:

**Thailand** International Monetary Fund. Monetary and Capital Markets Department, 2019-10-24 This technical note on the risk assessment for Thailand discusses that the Thai banking system shows a substantial resilience to severe shocks. The solvency stress tests indicate that the largest banks can withstand an adverse scenario broadly as severe as the Asian financial crisis. While three banks would deplete their capital conservation buffer CCB under the adverse scenario recapitalization needs would be minimal. A battery of complementary sensitivity stress tests which allows to cover in more detail certain risk factors also confirmed the overall picture of a resilient banking system. No particular vulnerability emerged from the analysis of the bond portfolio to an increase in government and corporate spreads, exposure to foreign exchange risk and concentration risk in the loan portfolio with the possible exception of one entity with a particular concentration on single name exposures. The liquidity stress test on investment funds IFs showed that they would be able to withstand a severe redemption shock and its impact on the banks and the bond market would be limited.

*United Republic of Tanzania*  
International Monetary Fund. African Dept., 2015-01-14 KEY ISSUES Macroeconomic developments remain favorable. Economic growth was strong during the first half of 2014 and is expected to remain close to 7 percent. Inflation remains in mid single digits consistent with the authorities target of 5 percent by June 2015. New national accounts statistics show an upward revision of the 2007 GDP by 28 percent. The full series will be reflected in the program at the next review. Program performance through June was broadly satisfactory but has deteriorated since and risks have risen. While all end June assessment criteria were met most end September indicative targets were missed. The continuous assessment criterion on non accumulation of external arrears was also missed and structural reform implementation was slower than expected. These developments reflect a range of factors including delays in donor financing related to governance concerns, delays in mobilizing external non concessional borrowing, ENCB revenue shortfalls, the authorities decision to front load domestically financed capital expenditure and coordination issues. Discussions focused on how to mitigate risks to budget implementation related to financing uncertainty and revenue shortfalls. Meeting the fiscal deficit target for 2014/15 will require revising downward revenue and expenditure during the mid year budget review. Addressing forcefully and expeditiously the governance concerns arising from the IPTL case will be critical both for the resumption of donor financing and the business environment. In the meantime the financing mix will tilt towards larger and more front loaded ENCB. Better coordination of monetary and fiscal policies is required to reduce and eventually eliminate recourse to conversion of liquidity paper into financing paper. Government arrears will be addressed comprehensively. A plan to verify and clear existing suppliers arrears which continued to accumulate in 2013/14 better monitor and prevent the emergence of new ones will be implemented in the coming year. Broad principles of a strategy to deal with arrears to pension funds have been agreed. Staff supports the authorities request for the completion of the first PSI review and proposes a waiver for non observance of an assessment.

criterion and the modification of assessment criteria
