Business strategies: Blue Ocean Strategy Katharina Niciejewska, Dimitar Dimitrov, 2009-11-16 Seminar paper from the year 2008 in the subject Business economics Business Management Corporate Governance grade 1.7 Hamburg University of Applied Sciences course Marketing Strategien language English abstract In a business context it is inevitable that one of the main words one would hear is competition In a way doing business is like participating in a competition for market share profits etc Even one of the basic theories of trade the one of Ricardo speaks about the competitive advantage and its importance But how to become successful in doing business Does a recipe exist which guarantees that a business could thrive and be successful On the one hand one could argue that business opportunities arise from the environment lead by an invisible hand and the essentials of doing business are similar to the one centuries ago and that people do not have substantial influence On the other hand others would argue that the success of a business is predominantly result of the well prepared planning and in that way is connected more to the human merchant's abilities rather than to the environment itself Surely the centuries of business history has shown that answering the question what makes a business successful does not have a clear answer It would be very shallow way of thinking to give a simple answer to this question Surely the environment plays an important role for the business but the other way round doing business is not a

random game In contrast only thinking strategically without being in the appropriate environment and without any resources it is quite impossible to set up a successful business Furthermore the business environment is not static but instead very dynamic As the time passes by businesses change and what was true about business success centuries or even a decades ago is not true any more At the same time it does not mean that business now and in the past has nothing in common On the contrary nowadays the business and management science is so complex and possesses sophisticated methodology and tools which help to prove that the strategical way of thinking in the context of doing business is an essential part of the success of a company And even the understanding of business strategy is different because it could range from simple planning to the application of very complex scientific business models However as the business environment changes so do the business strategies as well That s why some of the often considered for true strategies seem to be out of date with the business reality For that reason if a strategy does not work one has to check it again **Inside Hitler's High Command** Geoffrey P.
