## **Ophthalmic Study Guide:**

**Ophthalmic Study Guide for Nurses and Health Professionals** Dorothy Field, Julie Tillotson, Mandy Macfarlane, 2009  
The book aims to increase the knowledge and skills of the ophthalmic practitioner at any level. Each section ends with a reflective question section allowing the reader to consider their own practice and learning needs. Areas covered include anatomy, physiology, a dynamic range of ophthalmic conditions with their associated investigations, management and care. Further chapters include the visual sciences, pharmacology and advice for practitioners and mentors alike. The Ophthalmic Study Guide Dorothy Field, Marina Forbes, 2016-05-23  
This classic introduction to ophthalmology has been thoroughly revised and updated to reflect the changes in practice that have taken place since it was first published in 2009. In recent years, an increasing variety of health professionals have been involved with the care of ophthalmic patients. The aim has been to provide an efficient, high quality and cost effective service to patients which utilises the skills of the multidisciplinary ophthalmic team. This study guide offers both a basic introduction and a skills escalator for nurses and other health professionals. Those who make use of its content and use the To do panels for reflection and research will develop their knowledge and skills more quickly and acquire good habits of self assessment and self directed learning. The simple questions at the end of each chapter can be used for self testing or as a basis for questions that mentors can ask their students. The content is deliberately restricted to the basics in terms of the areas chosen though they are all covered in reasonable depth. Students are encouraged to use the skills checklists at the end of the book to document their personal progress and validate their developing practice. These will provide useful evidence for annual performance appraisals.
