Nonlinear Optimization Francisco J. Aragón, Miguel A. Goberna, Marco A. López, Margarita M.L. Rodríguez, 2019-02-27 This textbook on nonlinear optimization focuses on model building real world problems and applications of optimization models to natural and social sciences. Organized into two parts this book may be used as a primary text for courses on convex optimization and non convex optimization. Definitions, proofs and numerical methods are well illustrated and all chapters contain compelling exercises. The exercises emphasize fundamental theoretical results on optimality and duality theorems, numerical methods with or without constraints and derivative free optimization. Selected solutions are given. Applications to theoretical results and numerical methods are highlighted to help students comprehend methods and techniques.

Optimization in integers and related extremal problems Thomas L. Saaty, 2014-12-19 This text, the first of its kind, surveys the entire field of optimization in integers. It is designed for students of mathematics, engineering, science, social science, and operations research. It will stimulate and excite the reader's interest in the elementary methods and ideas of discrete optimization and related problems. The text presents the current theories and a wide variety of examples and applications of optimization in integers in both geometric and algebraic settings. Coverage is given to a wide class of problems and the ways in which they may be handled. The text includes numerous exercises and illustrations.

Optimization and Control for Partial Differential Equations Roland Herzog, Matthias Heinkenschloss, Dante Kalise, Georg Stadler, Emmanuel Trélat, 2022-03-07 This book highlights new developments in the wide and growing field of partial differential equations (PDE) constrained optimization. Optimization problems where the dynamics evolve according to a system of PDEs arise in science, engineering, and economic applications and they can take the form of inverse problems, optimal control problems, or optimal design problems. This book covers new theoretical, computational, as well as implementation aspects for PDE constrained optimization problems under uncertainty in shape optimization and in feedback control, and it illustrates the new developments on representative problems from a variety
