Education 2 0 offers a compelling portrait of Egypt s bold attempt to overhaul its public education system amid sweeping political and technological transformation Drawing on extensive oral history interviews this book traces the launch and rollout of the New Education System initiated by the Ministry of Education in 2018 designed to modernize curriculum pedagogy and assessment in the digital age and change the culture of learning The volume moves fluidly from macro level state planning to the lived experiences of teachers and students exploring the promises and pitfalls of top down reform Conducted partly during the COVID 19 pandemic the research captures Egypt s first large scale experiment with hybrid and distance learning Interviews with key actors from policymakers and tech developers to students and educators reveal competing visions unintended consequences and the challenges of culturally transforming education systems in a middle income country where private tutoring is rife the sector is chronically under resourced and politics overshadows policy This book is essential reading for scholars practitioners and policymakers interested in education reform digital transformation and the role of the state in shaping learning futures in the Global South It is also an excellent case study for courses in Middle East studies and comparative and international education *Handbook of Research on Science Education, Volume II*
