ePub - European Conference on Social Media Sue Greener,Asher Rospigliosi,2014-11-07 *Transforming Ethos* Rosanne Carlo,2020-09-01 In Transforming Ethos Rosanne Carlo synthesizes philosophy rhetorical theory and composition theory to clarify the role of ethos and its potential for identification and pedagogy for writing studies Carlo renews focus on the ethos appeal and highlights its connection to materiality and place as a powerful instrument for writing and its teaching one that insists on the relational and multimodal

aspects of writing and makes prominent its inherent ethical considerations and possibilities Through case studies of professional and student writings as well as narrative reflections Transforming Ethos imagines the ethos appeal as not only connected to style and voice but also a process of habituation related to practices of everyday interaction in places and with things Carlo addresses how ethos aids in creating identification transcending divisions between the self and other She shows that when writers tell their experiences they create and reveal the ethos appeal and this type of narrative multimodal writing is central to scholarship in rhetoric and composition as well as the teaching of writing In addition Carlo considers how composition is becoming compromised by professionalization particularly through the idea of transfer which is overtaking the critical work of self development with others that a writing classroom should encourage in college students Transforming Ethos cements ethos as an essential term for the modern practice and teaching of rhetoric and places it at the heart of writing studies This book will be significant for students and scholars in rhetoric and composition as well as those interested in higher education more broadly

The Routledge Handbook of Architecture, Urban Space and Politics, Volume I

Nikolina Bobic, Farzaneh Haghghi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license

The Academy ,1877 **Paris Under Construction** Jacob Paskins,2015-12-07 During the 1960s building sites in Paris became

spaces that expressed preoccupations about urban transformation labour immigration and national identity As new buildings and infrastructure changed the city building sites revealed the substandard living and working conditions of migrant construction workers in France Moreover construction was the touchstone in debates about the dangers of urban life and triggered action in communities whose districts faced demolition Paris Under Construction explores the social political and cultural responses to construction work and urban transformation in the Paris metropolitan region during the 1960s This examination of a decade of intensive building work considers the ways in which the experience of construction was mediated produced and reproduced through a range of complex and sometimes contradictory representations The building sites that produced the new Paris are no longer visible and were perhaps never intended to be seen yet different groups closely observed and recorded construction giving it meanings that went beyond specific building activities The research draws extensively on French newspaper television and radio archives and delves into rarely examined trade union material Paris Under Construction gives voice to the witnesses of and participants in urban transformation who are usually excluded from architectural and urban history
