Parties Without Partisans Political Change In Advanced Industrial Democracies Comparative Politics:

Parties Without Partisans Martin P. Wattenberg, 2000-11-30 If democracy without political parties is unthinkable what would happen if the role of political parties if the democratic process is weakened The ongoing debate about the vitality of political parties is also a debate about the vitality of representative democracy Leading scholars in the field of party research assess the evidence for partisan decline or adaptation for the OECD nations in this book It documents the broadscale erosion of the public's partisan identities in virtually all advanced industrial democracies Partisan dealignment is diminishing involvement in electoral politics and for those who participate it leads to more volatility in their voting choices an openness to new political appeals and less predictability in their party preferences Political parties have adapted to partisan dealignment by strengthening their internal organizational structures and partially isolating themselves from the ebbs and flows of electoral politics Centralized professionalized parties with short time horizons have replaced the ideologically driven mass parties of the past This study also examines the role of parties within government and finds that parties have retained their traditional roles in structuring legislative action and the function of government further evidence that party organizations are insulating themselves from the changes transforming democratic publics Parties without Partisans is the most comprehensive cross national study of parties in advanced industrial democracies in all of their forms in electoral politics as organizations and in government Its findings chart both how representative democracy has been transformed in the later half of the 20th Century as well as what the new style of democratic politics is likely to look like in the 21st Century **Parties**

Political Parties and Interest Groups in Norway Elin Haugsgjerd Allern, 2024-10-31 How do today's political parties relate to other organisations Do they prefer rather distant relationships with a wide range of interest groups or have they virtually detached themselves from civil society altogether Scholars seem to agree that traditionally close relationships such as those between social democratic parties and trade unions have grown weaker since the 1960s But to date only limited systematic research has been conducted While parties and interest groups attract a great deal of attention from political scientists the links between them have been largely overlooked This book is an attempt to bridge the gap starting from the party side of the relationship It throws new light on the topic by presenting a theory driven comprehensive study of Norway's seven major political parties and their relationships with interest groups at the beginning of the new millennium Based on original and extensive data including party documents in depth interviews with key players and a survey of national party elites Elin Haugsgjerd Allern paints a nuanced picture of the nature and significance of these relationships and the factors that shape them A major conclusion is that Norway's parties tend to maintain rather distant but wide ranging relationships with interest groups today However some parties still have fairly strong links with their traditional associates and a narrower network of links with other groups Hence Allern also shows that significant differences exist between parties that are apparently exposed to the same social political and institutional environment

Party Organization and Electoral Volatility in Central and Eastern Europe Sergiu Gherghina, 2014-10-17 Political parties in post communist countries have very high levels of electoral volatility In these environments political factions fail to establish long term connections with the electorate and thus regularly rise and fall from the political arena This book provides an organizational explanation for the variations in party level electoral volatility It looks comparatively at 29 political parties in six Central and Eastern European democracies between 1990 and 2008 to examine how political parties can influence their electoral environment Using empirical evidence Gherghina tests the effect of candidate selection procedures membership organizations and re nomination of incumbent MPs on voters loyalty and in doing so demonstrates how party organization greatly affects electoral stability Including case studies from Bulgaria Czech Republic Hungary Poland Romania and Slovakia this book will be of interest to students and scholars of comparative politics party politics democratization elections and Central and Eastern European politics
