This book discusses issues surrounding clean water and air and helps equip the reader to better understand daily risk exposures and encourages the reader to start making practical positive changes immediately. Written by a physician board certified in Integrative Medicine and a PhD toxicologist the book is replete with relevant cost effective and practical ways to reduce exposure and lower risk for the developing illness. Tips and recommendations are given for choosing and preparing foods methods of cooking and cleaning and how to choose safer household furnishings toys and personal care products. Throughout the authors goal is to help readers decode technical concepts such as understanding product labels and wading through the confusing and often misleading waters of marketing terminology. Each chapter concludes with a list of references documenting the clinical studies and other scientific evidence for the recommendations in the book.
