Kids Across the Spectrums Meryl Alper, 2023-08-15 An ethnographic study of diverse children on the autism spectrum and the role of media and technology in their everyday lives In spite of widespread assumptions that young people on the autism spectrum have a natural attraction to technology a premise that leads to significant speculation about how media helps or harms them relatively little research actually exists about their everyday tech use In *Kids Across the Spectrums* Meryl Alper fills this gap with the first book length ethnography of the digital lives of autistic young people Based on research with more than sixty neurodivergent children from an array of racial ethnic and socioeconomic backgrounds *Kids Across the Spectrums* delves into three overlapping areas of their media usage cultural belonging social relationships and physical embodiment Alper's work demonstrates that what autistic youth do with technology is not radically different from their non autistic peers However significant social and health inequalities including limited recreational programs unsafe neighborhoods and challenges obtaining appropriate therapeutic services spill over into their media habits With an emphasis on what autistic children bring to media as opposed to what they supposedly lack socially Alper argues that their relationships do not exist outside of how communication technologies affect sociality nor beyond the boundaries of stigmatization and society writ large Finally she offers practical suggestions for the education healthcare and technology sectors to promote equity inclusion access and justice for autistic kids at home at school and in their communities

With each topic I discuss what it is, give examples for each and break down each example providing more detail of just some of the possible reasons as to why people do them. Possible mentalities I also provide some of my own experiences and everything discussed in this book I have personally witnessed and or have gone thru. I included the following Situations based on personal experience and or witnessing them with some online research to support certain issues. My perception perspective and mentality on various issues that affects everyone to some degree. Quotes that further support certain chapter topics. Philosophies, analogies and comparisons to provide better contextual clarification on certain issues. Detailed breakdown of the examples provided within each chapter. Explanation of what it will take to help fix each of these issues. Some of the many possible reasons why people behave the way they do and some of the possible motives, intentions and life experiences from both sides person doing the behavior and the person receiving the treatment. Solutions to all the topics that are discussed changes that we need to make with how we think and act towards others. Furthermore I provide much thought provoking material to challenge the way we think and view society in ways you might not have considered. I discuss many unhealthy mentalities and behaviors which is damaging to people on a much larger scale and it's having a much greater influence on others both directly and indirectly in ways that we do not even realize. This book is something the whole world needs to read and here is why. Providing solutions to some of the biggest cultural and social issues which have existed for far too long. The way the world is with how we treat others is badly broken and some of the solutions are in this book which the world needs the solutions I provide. We do the same or similar behaviors towards others expecting different results and this is not working at all. We need to step outside our comfort zone by changing their behaviors in ways we're not used to doing to get something you've never had. You must first do something that you've never done. The world needs to be less close minded and use less tunnel vision. The mind is like a parachute, it can't work if it's not opened. I see the world differently and the purpose of this book is to share different ways of looking at situations and the numerous possibilities to take into consideration. I share my perception and perspective viewpoint mentality and some of my own philosophies. I provide a more in-depth perspective of looking at a variety of life situations and the possible reasons as to why people choose to treat others the way they do. I think a lot of people might find this content in general interesting, beneficial, inspiring and or even life changing. **New Directions in Childhood Studies** James M. Curtis, 2024-01-04. *New Directions in Childhood Studies: Innocence, Trauma, and Agency in the Twenty-first Century* acknowledges that the conceptual frameworks for understanding the experience of

childhood in the twentieth century are no longer adequate and offers important updates to the construct of American childhood. The chapters in this collection examine contemporary children's literature, film and video games to explore the ways in which everyday realities like trauma, disaster and death impact the experience of childhood in America today. In many ways the essays show the narratives blur traditional lines between children's and adult content, taking children's series as subjects while also guiding them through the processes of dealing with the particular challenges. Collectively the essays develop a more contemporary construct of the American child and offer new insights into what that construction might mean for contemporary American society and culture.
