unprecedented speculation money laundering and cyber crimes We also explore new opportunities in telehealth distant education and metaworld and the strides made in digital transformation that has in less than five years empowered over 2 billion people across the world giving them access to cost effective banking education travel energy food and health services But the same technologies are used to fight wars and disrupt supply chains that cause acute distress and worldwide recessions The book is relevant because the changes happening now are not incremental but tectonic This opens the door to a future that is more fascinating and threatening than fiction Read on to find out more
