[Strategic Management Audit Report for Amazon \(2020\)](#) Khaled Bekhet,2022-05-25 Academic Paper from the year 2020 in the subject Business economics Business Management Corporate Governance language English abstract A strategic audit is an in depth review to determine whether a company is meeting its organizational objectives in the most efficient way. Additionally it examines whether the company is utilizing its resources fully. A successful strategic audit is beneficial to any company. It assesses various aspects of a business and evaluates and determines the most appropriate direction for the company to move toward in achieving its goals. The purpose of this research is to examine Amazon's worldwide position as well as how its present business plan compares to its rivals and fits within the company's global outlook. The research was done utilizing financial data and public information from the company's website to see where they shine and where they fall short. To better analyze Amazon.com and identify areas for development graphs and comparative studies were created. The charts and tables that support the data are included in the following report. According to the findings of the data analysis Amazon is a very successful company that continues to be a dominant competitor in the online retail market. The researcher applied the most known tools in strategic management to assess the company's competitive strategy.

[The Amazon Provinces of Peru, as a Field for European Emigration](#) Herbert Guillaume,1888    [The Giant Raft .... 800 leagues on the Amazon](#) Jules Verne,1882    [E-Commerce in Times of Amazon. Chances and Risks for E-tailers](#) Samuel Weihrauch,2021-07-26 Master's Thesis from the year 2018 in the subject Business economics Trade and Distribution grade 1.00 Cologne University of Applied Sciences Informatik course Web Science E Commerce language English abstract The internet has revolutionised the way people shop and electronic commerce has reshaped the retail landscape dramatically. It suddenly allowed small companies to reach out to millions of potential customers and lowered market entry barriers significantly in areas where once only big retail companies competed.

against each other. But the times when small companies could create online shops and compete with the big players are almost over yet again and Amazon catalyses this change by seizing a growing share of the whole online retail market. Every second dollar spent online in the US is already spent on the Amazon.com marketplace and the trend in the German market is going in the same direction. The fact that a significant number of overall online sales are generated on the Amazon marketplace impacts other e-tailers. They must react to market concentration and consider whether or not they want to sell their products on Amazon. There are many opportunities and risks that can result from cooperation with Amazon but there is a lack of papers and books that consider both aspects at the same time quantifying them weighing each up against the other and deriving conclusions from it. The aim of this thesis is to close the aforementioned gap in available literature by presenting the current market situation in the e-commerce and analysing the signs of a further market concentration in order to provide evidence of the problematic situation small and medium sized enterprises (SME) are in. The thesis then examines the option of cooperating with Amazon as a possible solution to react on this trend and therefore researches the possible chances and risks that could arise through such cooperation. Those insights are thereafter incorporated into a strategic recommendation for e-tailers who consider selling on Amazon. Furthermore a selling guide which was evaluated in practice depicts how a company could sell products successfully on the marketplace. In the end this thesis should contribute to e-tailers knowledge about the current and future market situation in e-commerce. In addition the insights presented should support e-tailers decision making process when they are confronted with the question of cooperating with the e-commerce giant or not.
