Fairchild, AI, 2025-02-27 Fund Math offers a practical guide to mastering financial mathematics essential for sound economic decision making. The book emphasizes that understanding financial ratios, capital allocation, and business investment calculations is crucial for value creation. It uniquely bridges the gap between theoretical concepts and real world applications, empowering readers to make informed decisions. Did you know that concepts like Net Present Value (NPV) and Internal Rate of Return (IRR) are key tools for evaluating investment opportunities? The book highlights how dividend policies and share repurchase programs impact shareholder value. The book progresses from basic financial ratios to advanced topics like discounted cash flow (DCF) analysis. It uses real world case studies, contemporary data, and spreadsheet modeling to demonstrate calculations. For instance, understanding a company's cash flow is as vital as understanding its profit, akin to knowing how much water is actually in a bucket versus how much it should hold. Fund Math also connects to accounting, corporate strategy, and risk management, providing a holistic view of financial decision making.

**Evaluation of Some Remote Desktop Protocol (RDP) Services Providers** Dr. Hedaya Alasooly, 2020-11-13 Remote Desktop Protocol (RDP) is a proprietary protocol developed by Microsoft which provides a user with a graphical interface to connect to another computer over a network connection. The user employs RDP client software for this purpose while the other computer must run RDP server software. RDP refers to Remote Desktop protocol which connects your remotely connected computers or system over a RDP connected network. RDP gives a graphical interface to a client to be able to associate with another PC system or network. RDP servers are built on Windows OS but can be enabled on other OS as well. The major benefit of a remote desktop connection is being able to connect to your data from anywhere in the world. Your data is in one place that is easy to see and you no longer have to have software installed on your own computer. In simple term RDP is a short form of Remote Desktop Protocol it works as an icon to get in touch with an additional computer system usually it is utilized for attaching to a server organized in a data center to carry out jobs that typically do not need much user interaction and runs 24/7. Several of the extra usual uses of RDP servers are running bots, SEO devices, bitcoin mining, online video clip streaming, and running forex trading software and so on. Most RDP servers providers that provide free services during trial period will request debit/credit card information which is risky for us as they can claim any payment from the card. So that encouraged me to search for RDP services providers that can provide services during free trial period without requesting credit/debit card information. This report will investigate the possible ways to get free RDP server account or RDP server account at lowest cost. The report will consist from the following parts: Some RDP Services Providers with free trials, Some RDP servers providers that sell RDP with Credit Card, Debit Card, Bitcoin, PayPal or other E-wallets, Getting free RDP from [freerdpserver.com](http://freerdpserver.com), Getting free RDP from Google Cloud, Getting Google Cloud RDP VPS for free for one month through [Qwiklabs.com](http://Qwiklabs.com), Creating RDP through [Alibabacloud.com](http://Alibabacloud.com), Getting free RDP VPS for seven days from [CloudSigma.com](http://CloudSigma.com), Getting RDP VPS through Microsoft Azure.
