Health Promotion in the Universities and Other Educational Settings Miguel Corbí, Antoni Aguilo, Carmen Gallardo Pino, Mario Del Líbano, Carlos Emanuel Rodríguez-Díaz, Hiram V. Arroyo Acevedo, 2025-09-17. The promotion of health in universities is of great importance as it allows for the encouragement of healthy lifestyles and the prevention of diseases among students, teaching staff, and administrative personnel. The university is a conducive environment for the promotion of healthy habits since, firstly, it is usually the moment when the students make decisions under their responsibility, and secondly, it is a place where academic sports and social activities take place, so it is also an ideal moment to promote changes that can be transferred to society and the rest of the individual's life. Health promotion in universities can cover several areas such as healthy eating, physical exercise, prevention of addictions, emotional and social mental health, among others. It can also involve the entire university community, from students to administrative and teaching staff. In the case of students, it is essential as it is a period of change and habit formation, and the fact that they will be the future decision makers of society.
