Parliament: House of Commons: Energy and Climate Change Committee,2011-10-25 The Government must start thinking  
strategically about energy security to protect the UK s energy supply against short term shocks and rising global energy  
prices according to a report by MPs on the Energy and Climate Change Committee Gas storage capacity needs to be  
increased in the UK to minimise the potential damage from supply interruptions or price spikes the report argues It reveals  
that the UK s current storage capacity amounts to only 14 days worth of gas supply a dangerously low level compared with  
France which has 87 days worth of gas storage Germany 69 and Italy 59 19 gigawatts GW of ageing electricity plant will  
close by 2018 and the UK will become increasingly reliant on energy imports as North Sea oil and gas reserves decline The  
report concludes that new electricity generation currently being built or planned will fill this gap But it urges the  
Government to ensure security of supply by delivering on its energy efficiency targets rolling out smart meters that can
