## **Traditional, Complementary and Integrative Medicine - Opportunities for Managing and Treating Neurodegenerative Diseases and Ischaemic Stroke** Chun Guang Li,Bin Yu ,Huazheng Liang,2026-01-12

Neurodegenerative diseases and ischemic stroke represent significant global health challenges with conditions like Alzheimer s disease AD and stroke imposing a heavy burden on patients and their families Despite the approval of several drugs and antibodies for AD their ability to halt disease progression remains uncertain Stroke the second leading cause of death worldwide presents a similar challenge as many patients do not qualify for existing treatments like thrombolysis and endovascular thrombectomy and even among those treated full neurological recovery is rare Additionally vertigo often with unknown etiology complicates management efforts The limitations of current therapies underscore the urgent need for novel treatments Traditional complementary and integrative medicine TCIM offers a promising avenue with numerous herbal

recipes from systems like Traditional Chinese Medicine and Indian medicine showing potential in managing these conditions While some scientific studies and animal research have demonstrated promising results the precise bioactive compounds responsible for these effects remain unidentified suggesting that new therapeutic targets and compounds need to be explored Right now no single bioactive compound has been identified to mimic the therapeutic effect of the entire herbal recipe on ischemic stroke This raises the concern that the known targets we have been testing may not be fully responsible for the pathogenesis of the above conditions New targets such as signal pathways involved in the contraction dilation or even death of pericytes in the brain might be key players as well Further research is needed to screen more potent bioactive compounds or to discover new targets and corresponding therapeutics There are assumptions that a single bioactive compound is unable to take the therapeutic effect instead it is the combination of multiple ingredients in the herbal recipe that restores the neurological functions of the patients This Research Topic aims to collect original research reviews and meta analyses to demonstrate the therapeutic effects of traditional complementary and integrative medicine on neurodegenerative diseases stroke and vertigo and to unravel their underlying mechanisms The goal aligns with the World Health Organization s strategic plan for future development seeking to validate and expand the understanding of TCIM s role in managing these complex conditions By exploring the synergistic effects of multiple ingredients in herbal recipes this research aims to identify new therapeutic targets and develop effective treatments that restore neurological functions To gather further insights into the therapeutic potential of traditional complementary and integrative medicine we welcome articles addressing but not limited to the following themes Clinical studies assessing the efficacy of TCIM including herbal recipes plant derivatives and other natural products in managing neurodegenerative diseases stroke and vertigo Basic original research on the underlying mechanisms of TCIM in managing these conditions Systematic reviews or meta analyses on the efficacy of specific recipes or individual bioactive compounds and their mechanisms In vitro and in vivo studies contributing to the understanding of TCIM s mechanisms in managing neurodegenerative diseases stroke and vertigo Please note All the manuscripts submitted to the collection will need to fully comply with the Four Pillars of Best Practice in Ethnopharmacology you can freely download the full version here Please self assess your MS using the ConPhyMP tool and follow the standards established in the ConPhyMP statement Front Pharmacol 13 953205 Please note the traditional context including the primary background and modern uses with supporting references must be included in the manuscript introduction Purely in silico approaches using complex mixtures extracts are generally not considered You need to check your MS using <https://gaonline.org/best-practice> and include a PDF in your resubmissions with the relevant tables of the tool filled 1 and 2a cf Front Pharmacol 13 953205 <https://doi.org/10.3389/fphar.2022.953205> Take Control of iCloud, 9th Edition Joe Kissell, 2025-12-30 Understand iCloud s capabilities and limitations and put its key features to good use Version 9.3 updated December 30 2025 Apple s iCloud service is useful but can also create headaches for the average user In this book
