What causes us to age At first that sounds like a stupid question Aging is such an intrinsic aspect to the human condition we tend to take for granted it just happens But we live in a world of cause and effect Aging is an effect so what is the cause The common way of thinking about this is from the perspective our bodies are physical and everything else that s physical eventually wears out or breaks down such as our cars our houses and even our computers That s known as the wear and tear theory of aging But our bodies are different from such items because they re alive and in optimum conditions of health regenerate themselves if at all possible Cuts heal over broken bones knit and so on Indeed every day millions of our cells die in the course of performing their functions They re simply replaced by new cells Our bodies can even work around permanently damaged tissue even including the brain itself However at a certain point our bodies become less able to repair

and regenerate About age 40 we stop totally repairing and processing all the protein from our dead and damaged cells Like a declining city running out of tax revenue services such as street repair and garbage collection get farther and farther behind The fear of death and the desire to live youthfully forever have obsessed humanity since the dawn of our species In one way or another we have searched for the Fountain of Youth to become immortal eternally young In the last hundred to hundred fifty years or so the average life span of people especially in the developed world has increased dramatically Credit for that goes principally to improved sanitation antibiotics improved care of infants and small children and an increase in the food supply So we've removed or dramatically reduced many of the causes of childhood through adulthood death We're living longer because more of us reach old age Once there however the main causes of death are heart disease cancer and strokes The medical establishment has created heroic measures to help people with these and related problems But what if we could avoid them altogether What if we could cure the disease of old age How long would we live Isn't that a better question That's the purpose of this short report to tell you about the Nobel winning medical research on telomeres and telomerase which may hold the key to an extra long lifespan and the supplement which is available right now to help you live longer It's not for everybody and it may not be for you And you'll also learn additional ways to maintain good health far into advanced old age Now we have additional scientific evidence showing moderate exercise a noninflammatory diet controlling stress and antioxidants really do help you live not only better but longer This is a short report around 10 000 words on the amazing health and anti aging benefits available right now to seniors who wish to postpone old age and death as long as possible Therefore scroll up and download it right away [Vegan Intermittent Fasting](#) Petra Bracht,Mira Flatt,2021-03-02 Intermittent fasting has emerged as an evidence based revolution in health and wellness And even if you usually eat meat and fish why not do a plant based intermittent fasting reset You can start at any time and lose weight while still eating the foods you love In the popular 16 8 method you eat 2 to 3 times over 8 hours then fast for 16 hours which of course includes time spent asleep The result can be astounding weight loss a stronger immune system increased longevity and so much more Let Petra Bracht General Practitioner and Naturopath and recipe developer Mira Flatt guide you through the transition to a fasting lifestyle with medically supported advice and over 80 satisfying vegan recipes including ideas for lunch such as Rainbow Summer Rolls protein packed dinners like Smoked Tofu Potato Salad or Chili sin Carne and healthy desserts like Chocolate Cardamom Truffles Live healthier and longer with this complete vegan guide to intermittent fasting [The Galveston Diet](#) Mary Claire Haver,2023-01-12 From the New York Times Bestselling author The UK edition of the menopause health plan that is taking the US by storm and already helped 100 000 women lose stubborn weight and tame their symptoms When Dr Mary Claire Haver hit the perimenopause she was shocked at the severity of her symptoms She had always lived a very healthy lifestyle but the weight seemed to be piling on and no diet or fitness regime could shift it Exhausted and miserable she decided to research her own solutions and was able to transform her health with three principles which are
