

## Microeconomics Chapter 8

### The costs of taxation

#### Tax on a good levied on buyers

- Demand curve shifts downward by the size of tax

#### Tax on a good levied on sellers

- Supply curve shifts upward by the size of tax

#### Tax on a good levied on buyers or on sellers

- Same outcome: a price wedge
- Price paid by buyer rises
- Price received by sellers falls
- Lower quantity sold

#### Tax burden

- Distributed between producers and consumers
- Determined by elasticities of supply and demand

#### Economic Welfare

- Buyers: consumer surplus
- Sellers: producer surplus
- Government: total tax revenue (tax times quantity sold), public benefit from the tax

#### Welfare without a tax

- Consumer surplus, A, B, and C
- Producer surplus, D, E, and F
- Total tax revenue = 0

#### Welfare with tax

- Smaller consumer surplus, A
- Smaller producer surplus, F
- Total tax revenue, B and D
- Smaller overall welfare

Losses of a surplus to buyers and sellers from a tax exceed the revenue raised by the government

Deadweight loss fall in total surplus that results from a market distortion, such as a tax

#### Taxes distort incentives

- Markets allocate resources inefficiently

#### Taxes cause deadweight losses

- Prevents buyers and sellers from realizing some of the gains from trade

#### The gains from trade

- Difference between buyers value and sellers cost are less than the tax
- Once the tax is imposed some trades are not made: deadweight loss

#### Price elasticities of supply and demand

- More elastic supply curve, larger the deadweight loss
- More elastic demand curve, larger the deadweight loss
- The greater the elasticities of supply and demand, the greater the deadweight loss of a tax

## Microeconomics Connect Chap 8:

**Models in Microeconomic Theory** Martin J. Osborne, Ariel Rubinstein, 2023-06-26 Models in Microeconomic Theory covers basic models in current microeconomic theory. Part I Chapters 1-7 presents models of an economic agent discussing abstract models of preferences, choice and decision making under uncertainty before turning to models of the consumer, the producer and monopoly. Part II Chapters 8-14 introduces the concept of equilibrium beginning unconventionally with the models of the jungle and an economy with indivisible goods and continuing with models of an exchange economy, equilibrium with rational expectations and an economy with asymmetric information. Part III Chapters 15-16 provides an introduction to game theory covering strategic and extensive games and the concepts of Nash equilibrium and subgame perfect equilibrium. Part IV Chapters 17-20 gives a taste of the topics of mechanism design matching the axiomatic analysis of economic systems and social choice. The book focuses on the concepts of model and equilibrium. It states models and results precisely and provides proofs for all results. It uses only elementary mathematics with almost no calculus although many of the proofs involve sustained logical arguments. It includes about 150 exercises. With its formal but accessible style, this textbook is designed for undergraduate students of microeconomics at intermediate and advanced levels.

[A Short Course in Intermediate Microeconomics with Calculus](#) Roberto Serrano, Allan M. Feldman, 2012-11-30 This is a textbook for an intermediate level course in microeconomics that uses calculus throughout. Most of the competition either uses no calculus or relegates the math to footnotes and appendices. The text also focuses on theory rather than empirical data. To motivate the analysis, the authors include references to real events and firms with no distracting separate boxes.

**Microeconomic Laws** Alexander Rosenberg, 2010-11-23 Rosenberg applies current thinking in philosophy of science to neoclassical economics in order to assess its claims to scientific standing. Although philosophers have used history and psychology as paradigms for the examination of social science, there is good reason to believe that economics is a more appropriate subject for analysis. It is the most systematized and quantified of the social sciences; its practitioners have reached a measure of consensus on important aspects of their subject and it encompasses a large number of apparently law-like propositions.
