

# Reflection and Action Plan in Nursing Practice

 Exclusively available on IvyPanda

Reflection is an essential part of the practitioner's activity as it aims at stimulating the professional to improve the skills and learn how to deal with difficult situations (Eaton 2016). When reflection is applied, the practitioner becomes more experienced and confident of his/her abilities (Jasper 2006, Blair & Deacon 2015, Howatson-Jones 2016). A reflective person is open to communication in the way of gaining the best outcomes for the patients. Critical thinking is considered an inseparable part of reflective practice (Lillyman & Merrix 2012, Thompson & Pascal 2012). Inability to accept criticism may be an obstruction to reflective practice as it often presupposes admitting one's fault and being ready to improve one's methods. On the other hand, being too much critical is also bad as it undermines the practitioner's confidence in his/her knowledge and skills (Ely & Scott 2007).

The reflective cycle proposed by Gibbs is considered one of the most efficient models (Ely & Scott 2007, Scaife 2010, Bulman, & Schutz 2013). It includes the following stages: description, thoughts and feelings, evaluation, analysis, conclusion, and action plan (Ely & Scott 2007, p. 187). I shall apply this model when describing my reflection on the mentioned practice issue. The type of knowledge informing the practice is personal experience (Freeman& Sturdy 2015).

## Reflection on an Identified Practice Issue

### Description

I noticed that two of my colleagues often neglected the rules of hand hygiene. They did not always wash their hands or change gloves when switching from one type of work to another. Sometimes they disrespected the hygiene requirements because of the lack of time (for instance, when there was a patient delivered by an ambulance, and there was no time to spare because the person's life was in danger and every minute was crucial).

It assembled more than 300 researchers and practitioners in the fields of technology, philosophy, history of ideas, literature, linguistics, social science, etc. The conference was an initiative from the Swedish Center for Working Life based on the project AI Based Systems and the Future of Language, Knowledge and Responsibility in Professions within the COST 13 programme of the European Commission. Participants in the conference and researchers related to its aims were chosen to contribute to this book. It is preceded by *Knowledge, Skill and Artificial Intelligence* (ed. B. G. Ranzon and I. Josefson, Springer Verlag 1988), *Artificial Intelligence, Culture and Language* (ed. B. G. Ranzon and M. Florin, Springer Verlag 1990) and *Dialogue and Technology, Art and Knowledge* (ed. B. G. Ranzon and M. Florin, Springer Verlag 1991). The two latter books have the same conference connection as this one and their aim is to present the contours of a research field with a multitude of issues that demands thorough investigation. The contributors thinking in this field varies.

greatly so do their styles of writing For example contributors have varied in their choice of he or he/she for the third person No distinction is intended but chapters have been left with the original usage to avoid extensive changes Similarly individual contributors' preference as to notes or reference lists have been followed
