*NYPD Battles Crime* Eli B. Silverman, 1999

In the last five years New York City has experienced the nation's most dramatic reduction in crime While the New York Police Department is receiving extensive publicity and praise as the key agent for the sharp decline many experts downplay the NYPD's role arguing instead that prevailing social economic and demographic conditions are the primary reasons for the unprecedented drop in crime rates This timely book informs the debate by detailing how innovative strategies adopted in 1994 by then police commissioner William Bratton had the immediate and sustained effect of lowering incidents of crime in every city precinct Eli B Silverman begins his study with a historical review of the evolution of police reform

movements in New York City showing that the achievements and failures of earlier external and internal initiatives formed the foundation for today's re engineered NYPD Drawing on privileged access to police documents and meetings he then

examines how the dynamic interaction of specific strategic organizational and managerial changes redefined the approach to policing transforming the department from a reactive to a proactive force In particular Silverman focuses on Compstat a sophisticated computer program that compiles crime statistics as the crucial mechanism for linking the development of new policies with effective tactics to control crime The up to date and accurate information provided by Compstat drives twice weekly crime strategy meetings that ensure essential planning coordination evaluation and accountability
