

## IVY'S Relationships and Biodiversity Autographed Leaf

*Streptocarpus* is a valuable plant because it produces Cramil, which is used as medication for breast cancer. *Streptocarpus* grows very slowly. It is on the endangered species list, so the ability to provide Cramil in large quantities is limited.

There is another plant species (X, Y, and Z) that may be related to *Streptocarpus* species. These 3 plant species grow faster, and they are plentiful. The plant that is the most similar to *Streptocarpus* might also produce Cramil. You will need to determine which plant is most closely related to *Streptocarpus* species. Then use this by studying the plants in different ways.
