Traditional Vs. Experiential Subhas Mohan,2015 This study explores the differences in student achievement on state standardized tests between experiential learning and direct learning instructional methodologies Specifically the study compares student performances in Expeditionary Learning schools which is a Comprehensive School Reform model that utilizes experiential learning to their counterparts or peer schools that utilize traditional instructional methodology This study employs a quasi experimental quantitative design Student test scores and individual answer responses on the New York State Regents Living Environment Earth Science and Chemistry science exams from the June 2012 and June 2013 administration were analyzed for both the Experiential Learning and the Traditional Learning groups Descriptive as well as inferential statistical analyses were performed on the data to determine the differences in students mean scores on various attributes of the test as well as differences in achievement levels for various sub groups of the sample The study found that the Experiential Learning group had statistically significant greater mean scores in overall performance on Living Environment Earth Science and Chemistry exams than theTraditional Learning group The study also found that students in

the Experiential Learning group outperformed their peers on critical thinking questions on all three science exams combined as well as on the Earth Science laboratory practicum exam. Additionally, the study found that English Language Learners (ELLs) and students with an Individual Education Plan (IEP) in the Experiential Learning group significantly outperformed their counterparts in the Traditional Learning group. This study concludes that Experiential Learning should be leveraged as a comprehensive school reform model to increase students' overall performance on state standardized science examinations. This study also concludes that Experiential Learning should be capitalized upon to increase student development of critical thinking skills as well as for students with special academic needs. Finally, this study provides further evidence that district and school leaders should strongly consider Experiential Learning as a comprehensive school reform model, a viable option to enable student achievement.

**Earth Science Simplified** Shure Tzippy, 2004-05-01. Earth Science Simplified. The perfect earth science review book is a book that helps students as they study for the Earth Science Regents exam or other standardized Earth Science examinations. This review book is unique in two ways. It's written in point-by-point format so that there is no need to read through lengthy paragraphs to find the necessary information. Concept charts placed after each chapter clarify and organize the material. In addition, this book contains snapshots of reference table charts throughout the chapters with explanations on how to use the charts. The entire Earth Science Reference Tables can be found at the back of the book. A number of practice Regents questions follow every chapter. Answers to these questions are located in the back of the book. Procedures for labs included in the performance test are explained.
