**Featuring Fat Facts** Patricia Roffey,2011 **Fat Politics** J. Eric Oliver,2005-11-15 It seems almost daily we read newspaper articles and watch news reports exposing the growing epidemic of obesity in America Our government tells us we are experiencing a major health crisis with sixty percent of Americans classified as overweight and one in four as obese But how valid are these claims In Fat Politics J Eric Oliver shows how a handful of doctors government bureaucrats and health researchers with financial backing from the drug and weight loss industries have campaigned to create standards that mislead the public They mislabel more than sixty million Americans as overweight inflate the health risks of being fat and promote the idea that obesity is a killer disease In reviewing the scientific evidence Oliver shows there is little proof that obesity causes so much disease and death or that losing weight is what makes people healthier Our concern with obesity he writes is fueled more by social prejudice bureaucratic politics and industry profit than by scientific fact Misinformation pushes millions of Americans towards dangerous surgeries crash diets and harmful diet drugs while we ignore other more real health problems Oliver goes on to examine why it is that Americans despise fatness and explores why despite this revulsion we continue to gain weight Fat Politics will topple your most basic assumptions about obesity and health It is essential reading for anyone with a stake in the nation s or their own good health **Obesity, Politics, and Self** Abigail Houck Neel,2012 **Embodying Policy? Young People, Health Education and Obesity Discourse** Laura De Pian,2013

*Obesity in the News* Gavin Brookes,Paul Baker,2021-11-25 Obesity is a pressing social issue and a persistently newsworthy topic for the media This book examines the linguistic representation of obesity in the British press It combines techniques from corpus linguistics with critical discourse studies to analyse a large corpus of newspaper articles 36 million words representing ten years of obesity coverage These articles are studied from a range of methodological perspectives and analytical themes include variation between newspapers change over time diet and exercise gender and social class The volume also investigates the language that readers use when responding to obesity representations in the context of online comments The authors reveal the power of linguistic choices to shame and stigmatise people with obesity presenting them as irresponsible and morally deviant Yet the analysis also demonstrates the potential for alternative representations which place greater focus on the role that social and political forces play in this topical health issue

**Fat Activism** Charlotte Cooper,2016 What is Fat Activism and why is it important Charlotte Cooper a fat activist with around 30 years experience answers this question by lifting the lid on a previously unexplored social movement and offering a fresh perspective on one of the major problems of our times

[Fat-Talk Nation](#) Susan Greenhalgh,2015-06-24 In recent decades America has been waging a veritable war on fat in which not just public health authorities but every sector of society is engaged in constant fat talk aimed at educating badgering and ridiculing heavy people into shedding pounds We hear a great deal about the dangers of fatness to the nation but little about the dangers of today's epidemic of fat talk to individuals and society at large The human trauma caused by the war on fat is disturbing and it is virtually unknown How do those who do not fit the ideal body type feel being the object of abuse discrimination and even revulsion How do people feel being told they are a burden on the healthcare system for having a BMI outside what is deemed with little solid scientific evidence healthy How do young people already prone to self doubt about their bodies withstand the daily assault on their body type and sense of self worth In *Fat Talk Nation* Susan Greenhalgh tells the story of today's fight against excess pounds by giving young people the campaign's main target an opportunity to speak about experiences that have long lain hidden in silence and shame Featuring forty five autobiographical narratives of personal struggles with diet weight bad BMIs and

eating disorders Fat Talk Nation shows how the war on fat has produced a generation of young people who are obsessed with their bodies and whose most fundamental sense of self comes from their size It reveals that regardless of their weight many people feel miserable about their bodies and almost no one is able to lose weight and keep it off Greenhalgh argues that attempts to rescue America from obesity induced national decline are damaging the bodily and emotional health of young people and disrupting families and intimate relationships Fatness today is not primarily about health Greenhalgh asserts more fundamentally it is about morality and political inclusion exclusion or citizenship To unpack the complexity of fat politics today Greenhalgh introduces a cluster of terms biocitizen biomyth biopedagogy bioabuse biocop and fat personhood and shows how they work together to produce such deep investments in the attainment of the thin fit body These concepts which constitute a theory of the workings of our biocitizenship culture offer powerful tools for understanding how obesity has come to remake who we are as a nation and how we might work to reverse course for the next generation
