Objects and Information Structure Mary Dalrymple,Irina Nikolaeva,2011-06-02 A cross linguistic study of how objects are affected by information structure [Diachrony of differential argument marking](#) Ilja A. Seržant,Alena

Witzlack-Makarevich,2018 While there are languages that code a particular grammatical role e g subject or direct object in one and the same way across the board many more languages code the same grammatical roles differentially The variables which condition the differential argument marking or DAM pertain to various properties of the NP such as animacy or definiteness or to event semantics or various properties of the clause While the main line of current research on DAM is mainly synchronic the volume tackles the diachronic perspective The tenet is that the emergence and the development of differential marking systems provide a different kind of evidence for the understanding of the phenomenon The present volume consists of 18 chapters and primarily brings together diachronic case studies on particular languages or language groups including e g Finno Ugric Sino Tibetan and Japonic languages The volume also includes a position paper which provides an overview of the typology of different subtypes of DAM systems a chapter on computer simulation of the emergence of DAM and a chapter devoted to the cross linguistic effects of referential hierarchies on DAM

The Diachrony of Differential Object Marking in Romanian Virginia Hill,Alexandru Mardale,2021 This book provides a comprehensive investigation of the origins development and stabilization of differential object marking DOM in Romanian It shows that Romanian DOM is a combination of Balkan and Romance patterns and sheds light on existing typological approaches

[Prominence in Austronesian](#) Bethwyn Evans,Åshild Næss,Jozina Vander Klok,2024-01-29 The cognitive concept of prominence is increasingly seen as key to understanding the organisation of grammar This volume explores the encoding of prominence in languages from across the Austronesian family The contributions show how prominence is relevant to understanding asymmetries at different levels of grammatical structure from discourse and information structure to argument expression and socio pragmatics Moreover common themes across contributions point to crosslinguistic tendencies that underpin the conventionalisation of communicative patterns for coordinating interlocutors attention and to points of departure for further crosslinguistic exploration of how grammatical asymmetries can be explained in terms of prominence

[Maltese](#) Przemyslaw Turek,Julia Nintemann,2022-04-04 This volume features nine articles covering various aspects of Maltese linguistics Part I mostly dedicated to the Maltese lexicon opens with Bednarowicz s comparison of Maltese and Arabic adjectives Fabri then categorizes various types of constructions involving the preposition ta of The paper by Lucas and Spagnol discusses Maltese words containing an innovative final n Part II deals with the syntax of Maltese Azzopardi s paper focuses on a construction in Maltese which consists of a sequence of two or more finite verbs Just and pl present the first corpus based study of differential object indexing in Maltese In Part III on morphosyntax Turek analyzes Arabic prepositions in Classical Modern Standard Arabic and Arabic dialects and contrasts them with their Maltese equivalents

Stoltz and Vorholt then analyze the structural and functional similarities and differences of spatial interrogatives in Maltese and Spanish Vorholt then investigates the adpositions of sixteen European languages including Maltese and examines the relationship between length and frequency The volume is closed with Part IV on phonology and Avram's paper in which the diachrony of voicing assimilation in consonant clusters is reconstructed **Morphological Perspectives** Baerman, Matthew Baerman, 2019-04-17 In a field still dominated by syntactic perspectives it is easy to overlook the words that are the irreducible building blocks of language Morphological Perspectives takes words as the starting point for any questions about linguistic structure their form their internal structure their paradigmatic extensions and their role in expressing and manipulating syntactic configurations With a team of authors that run the typological gamut of languages this book examines these questions from multiple perspectives both the canonical and the non canonical By taking these questions seriously and letting loose a full battery of analytical techniques the following chapters not only celebrate the pioneering work of Greville G Corbett but present new thinking on traditional approaches including the paradigm deponency and morphological features

Studies in Language, 1999 **Angles of Object Agreement** Andrew Nevins, Anita Petri-Stantic, Mark de Vos, Jana Willer-Gold, 2023-02-09 This volume draws on insights from a range of theoretical perspectives to explore objects agreement and their intersecting angles based on novel data from multiple language families The chapters explores the mechanics of object agreement constraints on symmetry features of object agreement and issues relating to the left periphery **Journal of Linguistics**, 2015 **Linguistics**, 2001 **Linguistic Notes from La Jolla**, 1998 **Linguistics and Language Behavior Abstracts**, 2007-07 **Working Papers in Linguistics**, 2005 **Language** George Melville Bolling, Bernard Bloch, 2010 Proceedings of the annual meeting of the Society in v 1 11 1925 34 After 1934 they appear in Its Bulletin **Bulletin de la Société de linguistique de Paris** Société de linguistique de Paris, 2008 Includes Comptes rendus bibliographiques

Archivio glottologico italiano, 2008 **Mixed Categories** Irina Nikolaeva, Andrew Spencer, 2019-10-31 Exploring the phenomenon of mixed categories this book is the first in depth study of the way in which languages can use a noun as opposed to an adjective to modify another noun It investigates noun adjective hybrids adjectives and adjective like attributive forms which have been derived from nouns and systematically retain certain nominal properties These rarely discussed types of mixed category raise a number of important theoretical questions about the nature of lexemic identity the inflection derivation divide and more generally the relationship between the structure of words and their phrasal syntax The book proposes a new formal framework that models cross linguistic and cross constructional variation in noun modification constructions The framework it offers enables readers to explicitly map word structure to syntactic structure providing new insights into and impacting upon all current theoretical models of grammar **Cumulative Author Index to Psychological Abstracts**, 1975 **Ostyak** Irina Alekseevna Nikolaeva, 1999
