Perspectives on Health Bud Getchell, Rusty Pippin, Jill Varnes, American Academy of Family Physicians, 1992

Staying Alive, Third Edition: Critical Perspectives on Health, Illness, and Health Care

Dennis Raphael, Toba Bryant, Marcia Rioux, 2019-12-13 This new edition of Staying Alive provides readers with a fresh perspective on health health care and illness in Canada and abroad Grounded in a human rights approach to health this edited collection includes chapters on the social construction of illness and disability social determinants of health and current critical issues in the field The third edition has been thoroughly updated and includes recent national and international developments in health care with current world statistics and an emphasis on austerity related changes and their effects on health and health care systems It includes chapters on pharmaceutical policy social class women s health and the impact of economic forces such as globalization and privatization in health care

Perspectives in Health Care Yvonne Bradshaw, Nancy North, 1997-09-03 Britain s health service has seen a period of unprecedented change over the last decade It is small wonder therefore that today s nursing and healthcare students as well as their teachers find it difficult to understand the organisation in which they work A team of authors from Portsmouth University have tackled this problem head on In Perspectives in Health Care they have produced a straightforward introduction to social policy for nurses nursing students and other health care professionals

Evidence, Policy and Practice Jon Glasby, 2011 This edited book provides a hard hitting and deliberately provocative overview of the relationship between evidence policy and practice how policy is implemented and how research can and should influence the policy process It critiques the notion of evidence based practice suggesting instead a more inclusive idea of knowledge base practice based in part on the lived experience of service users It will be of interest to everyone in health and social care policy practice and research

Accessibility and Utilization Alun E Joseph, David R Phillips, 1984-02-28 This book combines a wide ranging theoretical view of accessibility and utilization with empirical experience from a variety of comparable health care delivery systems those of the United Kingdom the United States Canada Australia and New Zealand The authors focus on primary health care provision but also consider secondary and tertiary facilities Where previous medical geography texts have dealt with disease ecology this book provides a comprehensive review of recent geographical research into the health service system and its utilization The book is clearly structured and well written enabling students to grasp the essentials of the subject The skilful use of references will permit more advanced students to follow up the topics in greater detail

Perspectives on Health and Exercise Jim

McKenna, Chris Riddoch, 2003 Although it is widely accepted that active people are healthier there is still much to be

understood about the relationship between health and exercise There are many questions to be explored such as how much and what type of activity Also are there population differences and what prevents people from being active This text considers physical activity and health from a range of perspectives encompassing many of the traditional academic disciplines to provide an overview of this developing field **Perspectives on the Health Professions** Edward H.

O'Neil,Diane M. Hare,1990 Gender Perspectives on Health and Medicine Marcia Texler Segal,Vasilikie Demos,Jennie Jacobs Kronenfeld,2003-10-23 Offers a critique of biomedical approaches to personal and public health and calls for more sociological input qualitative research and an intersectional approach to help us understand various aspects of health and illness This volume is about gender health and medicine broadly defined Health Behavior Sonya Bahar,2013-11-11

HEALTH BEHAVIOR AS BASIC RESEARCH Health behavior is not a traditional discipline but a newly emerging interdisciplinary field It is still in the process of establishing its identity Few institutional or organizational structures i e departments and programs reflect it and few books and journals are directed at it The primary objective of this book is thus to identify and establish health behavior as an important area of basic research worthy of being studied in its own right As a basic research area health behavior transcends commitment to a particular behavior a specific illness or health problem or a single set of determinants One way of achieving this objective is to look at health behavior as an outcome of a range of personal and social determinants rather than as a set of risk factors or as targets for intervention strategies directed at behavioral change The book is thus organized primarily in terms of the size of the determinants of concern rather than in terms of specific health behaviors or specific health problems or conditions With the first part of the book establishing working definitions of health behavior and health behavior research as basic frameworks the second part moves from smaller to larger systems informing the reader about basic research that demonstrates how health behavior is determined by personal family social institutional and cultural factors These distinctions reflect some arbitrariness the family organizations and institutions for example are social units **Health and Societies** Sarah Curtis,Ann Taket,1996 Throughout the world

the organization of health service delivery is undergoing a period of rapid change The health service professions under a variety of influences are renegotiating their approaches to health emphasizing health promotion and the prevention of illness This reorientation necessitates a stronger focus on the effects of social economic and environmental factors on health and on building intersectoral links to achieve these new goals This book examines the study of health health services and health policy from an interdisciplinary perspective drawing on the work of medical geographers sociologists anthropologists epidemiologists and other social scientists Incorporating a range of examples from both high and low income countries the authors identify particularly the issues which demonstrate changing perspectives on health health services and health policy and link these to our increasing understanding of different societies and social groups **Social and Cultural**

Perspectives on Health, Technology and Medicine Ciara Kierans,Kirsten Bell,Carol Kingdon,2016-02-22 Developments in

health science and technology have long provided fertile analytical ground for social science disciplines This book focuses on the critical and enduring importance of core concepts in anthropology and sociology for interrogating and keeping pace with developments in the life sciences The authors consider how transformations in medical and scientific knowledge serve to reanimate older controversies giving new life to debates about relations between society culture knowledge and individuals They reflect on the particular legacies and ongoing relevance of concepts such as culture society magic production kinship exchange and the body The chapters draw on the work of key historical and contemporary figures across the social sciences and include a range of illustrative case studies to explore topics such as transplant medicine genetic counselling cancer therapy reproductive health and addiction Of particular interest to students and scholars of anthropology sociology and science and technology studies this volume will also be a valuable resource for those working in the fields of health and medicine

Health Inequalities Katherine E. Smith, Clare Bambra, Sarah E. Hill, 2015-11-26 Informed by a wealth of available research between 1997 and 2010 the UK Labour government introduced a raft of policies to reduce health inequalities Despite this by most measures the UK's health inequalities have continued to widen This failure has prompted calls for new approaches to health inequalities research and some consensus that public health researchers ought to be more actively involved in public health advocacy Yet there is currently no agreement as to what these new research agendas should be and despite multiple commentaries reflecting on recent UK efforts to reduce health inequalities there has so far been little attempt to map future directions for research or to examine what more egalitarian policies means in practical terms *Health Inequalities Critical Perspectives* addresses these concerns It takes stock of the UK's experiences of health inequalities research and policy to date reflecting on the lessons that have been learnt from these experiences both within the UK and internationally The book identifies emergent research and policy topics exploring the perspectives of actors working in a range of professional settings on these agendas Finally the book considers potential ways of improving the links between health inequalities research policy and practice including via advocacy With contributions from established international health inequalities experts and newer up and coming researchers in the field as well as individuals working on

health inequalities in policy practice and civil society settings **Health Inequalities Critical Perspectives** is a must buy for researchers postgraduate students policymakers practitioners and research funders **International Perspectives on Mental Health** Hamid Ghodse, 2011-06 Is a unique collection of authoritative briefings from over 90 countries around the world Each chapter covers a particular country's demographics mental health resources undergraduate education postgraduate training in psychiatry research activities mental health legislation and policy and development strategies

Health in Diversity - Diversity in Health Katharina Crepaz, Ulrich Becker, Elisabeth Wacker, 2020-02-03 European public discourse often frames forced migration solely as a security issue and ignores the implications of societal diversity for health quality of life and well being in both Africa and Europe The present volume offers an interdisciplinary and international look at the relationship between refugees diversity and health including health care policies socio political framework conditions environmental factors the situation in refugee camps quality of life approaches and economical perspectives

Perspectives on Labour and Income, 2009 *Healthy Thoughts* Reidar Krummradt Lie, 2002 This book edited by a team of leading European bioethicists is in all respects an innovative publication As part of the core materials project of the European Ethics Network this book collects European perspectives on health care ethics reflecting both the rich philosophical tradition and the broad interdisciplinary network in the field of European health care ethics In the first part of the book on the physician patient relationship the authors present different views on the integration of patient autonomy in the relational structure of the medical profession Here the focus is on the reception of patient autonomy in the European context and on European alternatives for the radical understanding of patient autonomy In the second part of this book the contributions deal with the ethical problems of clinical research with patients and with the ethical values involved in human experimentation In the third part of the book the just organisation of the health care system and the consequent resource allocation are critically examined With their common European background the authors want to enrich and encourage the ongoing discussion on the physician patient relationship human experimentation and justice in health care from various perspectives and different points of departure Therefore this volume is suitable for the interested reader as well as for educational purposes **Improving Outcomes in Diabetic Foot Care - A Worldwide Perspective** Richard Paisey, José

Luis Lázaro Martínez, Joanne Paton, Frances Game, Honda Hsu, 2024-11-11 Enhanced population longevity decrease in physical activity and the obesity pandemic have resulted in an increase in incidence of type 2 diabetes in all WHO health care areas The prevalence of the condition has been further increased by an increase in life expectancy of those living with both type 1 and type 2 diabetes as a result of lifestyle and therapeutic interventions Microvascular complications of type 1 and type 2 diabetes mellitus are related to duration of the condition and include neuropathy in 20% of cases in all cultures Diabetic peripheral neuropathy in combination with propensity to distal peripheral vascular disease poor healing infection and foot deformities often result in foot ulceration and a uniquely high minor and major amputation risk The risk for foot

ulceration is modified by ethnicity foot flexibility and life style footwear and culture of walking bare foot Once a deep diabetic foot ulcer has developed the epidermis dermis tendon insertions and bone architecture will never return to normal The lack of resilience in the scar tissue formed and foot deformity after a deep ulcer will confer a high risk of re ulceration in fact previous foot ulceration is by far the highest risk factor for occurrence of a foot wound in persons living with diabetes
