Tropical Agriculturist and Magazine of the Ceylon Agricultural Society ,1882 An Engine, Not a Camera Donald MacKenzie, 2008-08-29 In An Engine Not a Camera Donald MacKenzie argues that the emergence of modern economic theories of finance affected financial markets in fundamental ways These new Nobel Prize winning theories based on elegant mathematical models of markets were not simply external analyses but intrinsic parts of economic processes Paraphrasing Milton Friedman MacKenzie says that economic models are an engine of inquiry rather than a camera to reproduce empirical facts More than that the emergence of an authoritative theory of financial markets altered those markets fundamentally For example in 1970 there was almost no trading in financial derivatives such as futures By June of 2004 derivatives contracts totaling 273 trillion were outstanding worldwide MacKenzie suggests that this growth could never have happened without the development of theories that gave derivatives legitimacy and explained their complexities MacKenzie examines the role played by finance theory in the two most serious crises to hit the world s financial markets in recent years the stock market crash of 1987 and the market turmoil that engulfed the hedge fund Long Term Capital Management in 1998 He also looks at finance theory that is somewhat beyond the mainstream chaos theorist Benoit Mandelbrot s model of wild randomness MacKenzie s pioneering work in the social studies of finance will interest anyone who wants to understand how America s financial markets have grown into their current form **Bibliography of Agriculture with Subject Index** ,1975-05
