Territorial Patterns of Innovation Roberta Capello,Camilla Lenzi,2013-07-18 This edited volume describes the spatial diffusion of knowledge and innovation using a large dataset at the regional level and presents scientific evidence on the role of knowledge and innovation on regional development The empirical results support a new design for innovation policies at the regional level which could help the European Union to achieve the targets set up in its 2020 Agenda Today financial capital general information consolidated technologies and codified knowledge are readily available virtually everywhere However the ability to organize these pervasive factors into continuously innovative production processes and products is by no means pervasive and generalized rather it exists selectively only in some places where tacit knowledge is continuously created exchanged and utilized and business ideas find their way to real markets *Territorial Patterns of Innovation* provides evidence that contrary to popular belief local knowledge intensity does not necessarily guarantee higher innovation performance Moreover the book shows that the growth benefits deriving from innovation do not necessarily match the strength of the formal local knowledge base and that regions innovating in the absence of a strong local knowledge base can be as successful as more knowledge intensive regions in turning innovation into a higher growth rate Together the contributions in this book offer a new understanding of the relationship between knowledge innovation and regional performance by delving beyond generally held beliefs It will be of value to regional scientists industrial economists and policymakers *The American Monthly Review of Reviews* Albert Shaw,1898 *Engineering and Mining Journal* ,1881
