Ai Tools Last 90 Days Returns:

90-Day AI Readiness Sprint Daniel Mercery, Most organizations adopting AI do not need multi year transformation programs they need clarity prioritization and momentum 90 Day AI Readiness Sprint provides a focused tactical playbook for small teams that want to adopt AI safely and credibly without excessive cost or bureaucracy This book is structured as a practical sprint breaking AI readiness into clear phases that can be executed over ninety days It emphasizes decision making governance basics and stakeholder alignment rather than technical experimentation Readers are guided through prioritizing use cases identifying key risks and implementing low effort controls that materially reduce exposure The sprint approach helps leaders avoid analysis paralysis while ensuring AI adoption aligns with organizational values risk tolerance and regulatory expectations Key elements include A phased 90 day AI readiness roadmap Minimum viable governance and risk controls Practical checklists for data vendors and usage approval Stakeholder alignment and communication guidance Criteria for scaling or stopping AI initiatives Designed for SMB leaders and small teams this playbook enables confident responsible AI adoption without requiring large budgets or specialized expertise **Passive Income** Conrad

Riker,101-01-01 *Escape the Grind Build Real Money While You Lead* Stuck trading hours for dollars Frustrated by passive schemes that demand constant effort Ready to stop begging for raises and start building empire level income This book gives you The science backed method to turn time into automated revenue Why feminine centric financial advice fails rational men How to leverage logic not luck for lasting cash flow The unapologetic truth about wealth and masculine responsibility Five battle tested systems that run while you lead Avoiding hustle culture traps that drain your authority Proof that passive income reinforces rational control Exact steps to launch in 72 hours using existing skills If you want to fund your freedom and lead without financial chains buy this book today *Total Hotel Mogel* Adam Mogelonsky,Larry Mogelonsky,2024-09-10 The future of upscale and luxury hotels is total revenues No longer simply a matter of driving occupancy properties in these categories must find ways to encourage guests of all segments to spend across a variety of ancillary revenue streams such as dining wellness golf and activities For the brand and owner s side this optimizes profitability while for the guest this augments the experience to maximize satisfaction a true win win Broken down by sections corresponding to each major hotel operation this book gives hoteliers the tools and inspiration to execute a total revenue focused commercialization strategy

Smart Technologies for the Digitisation of Industry: Entrepreneurial Environment Agnessa O. Inshakova,Evgenia E. Frolova,2021-10-01 This book discusses fusion of technology and body of knowledge through elaboration of theoretical concepts and conceptual frameworks to ensure the economic growth of the Russian Federation by utilizing the huge potential for innovation and entrepreneurship in Russia The book presents recent research to solve the most challenging problems facing digitalization in the field of entrepreneurship in the country Some of them need specialized personnel training the considerable financial resources needed for the maintenance of digital technologies how to market enterprises and

organizations and financial instruments designed to support industrial development The proposed results will create the conditions for a systemic approach to tilting towards supporting new ventures through an improved regulatory framework currently virtually absent in the field of entrepreneurship at the national level The book defines prospects for investment in renewable energy sources circulation of energy resources and energy efficiency improvements to gain positive economic effects from the introduction of new technologies

AI LAW MODEL FOR ETHICAL LEGISLATION: STRATEGIC RECOMMENDATIONS FOR THE REGULATION OF ARTIFICIAL INTELLIGENCE Oleksii Kostenko, 2025-10-20 This study the AI Law Model for Ethical Law Strategic Recommendations for the Regulation of Artificial Intelligence was created as a conscious and purposeful scientific paradigm for systemic flaws and hidden vulnerabilities identified in existing and draft regulations of the USA EU PRC and other leading jurisdictions in the field of artificial intelligence A comprehensive analysis of international practice shows that even the most ambitious and technologically advanced AI acts leave significant gaps from vague and contradictory definitions of basic concepts insufficiently elaborated and fragmented ethical requirements to the complete absence or insufficiency of a deep assessment of the socio psychological and cultural consequences of AI implementation Such shortcomings and regulatory gaps can lead to serious legal conflicts ethical crises increased social tensions as well as to the loss or undermining of public trust in digital institutions and public policy in general The purpose of the project Model AI Law for Ethical Law Strategic Recommendations for the Regulation of Artificial Intelligence is not only to warn against mechanical and little critical copying of foreign regulatory models but also to form a thorough approach adapted to the realities of national jurisdictions based on deep interdisciplinary expertise and comprehensive risk analysis This approach involves considering the legal technical ethical social cultural and medical aspects of AI implementation which makes it possible to consider LLM technology as a multidimensional phenomenon with long term consequences The key idea is that AI laws cannot be the product of the work of narrow profile initiators who are far from a systematic understanding of the technology or authors specializing exclusively in one field law technology medicine etc without proper involvement of related fields Only a broad association of interdisciplinary lawyers highly qualified technical specialists sociologists psychologists doctors ethicists cybersecurity and risk management specialists as part of integrated research groups provides a real opportunity to cover the entire range of direct and indirect risks as well as to predict the long term social economic and political consequences of the development and use of AI The structure of the study provides not only a formal statement of provisions but also sections that define and disclose in detail the fundamental principles of human centeredness transparency accountability non discrimination and cyber resilience taking into account international standards and scientific approaches At the same time these sections are combined with analytical blocks which systematically describe problem areas identified in other countries provide examples of negative consequences of ignoring these principles and formulate recommendations for avoiding such risks in Ukrainian legislation In particular the following critical aspects are emphasized

legal gaps and lack of clearly defined enforcement mechanisms that allow individual actors to avoid or minimize liability for the direct or indirect harmful consequences of the use of AI including economic ethical and social losses the lack of a single scientifically based and normatively fixed risk assessment scale which complicates the objective identification of the level of danger of specific AI solutions and creates opportunities for conscious or unintentional manipulations in the classification of systems in particular in order to avoid regulatory requirements or reduce the scope of verification measures lack of effective transparent and legally enshrined mechanisms of public control and independent audit capable of ensuring systematic monitoring objective assessment and public information about the compliance of AI systems with ethical and legal standards ignoring a deep and comprehensive analysis of the psychological emotional and sociocultural impacts of AI on vulnerable populations including children the elderly people with disabilities and other socially sensitive categories which can lead to deepening inequality social exclusion and negative transformations of cultural values weak integration and insufficient regulatory consolidation of internationally recognized technical standards and protocols into legal regulation which complicates the unification of requirements reduces the compatibility of national solutions with global ecosystems and creates risks of technical and legal fragmentation Thus this draft law is not only a draft law in the traditional sense but also a deeply thought out analytical and regulatory warning designed to become a conceptual guide for future state policy in the field of artificial intelligence Its task is to incorporate a multi level preventive mechanism into AI legislation that would combine preventive adaptive and corrective regulatory tools that can flexibly respond to new technological challenges and ethical dilemmas The implementation of this approach should guarantee not only a formal balance between legal regulation technological innovation and public security but also ensure the stability of this balance in the context of rapid transformations and global competition avoiding strategic and tactical mistakes already made by world leaders in this area

Corporate Risks and Leadership Eduardo E. Mariscotti, 2025-04-24 The context of business has been changing for companies in recent years and following numerous corporate and accounting scandals many countries have increased the number of national and international regulations designed to ensure transparency and compliance with the law Because of the existence of these new regulations the level of control the severity of sanctions by governments and the amount of fines for noncompliance have increased dramatically In parallel with the technological revolution in communications business management has become more transparent and any negative event is uploaded to social networks and shared with an indeterminate number of people This change in the regulatory sanctioning and technological context has forced large companies to rethink risks investments and budgets to deal with this more complex environment To transition to this change some companies have included ethics and compliance programs in their corporate agenda along with marketing and sales plans strategies growth targets investment plans and or talent acquisition While each industry has its particular risks in this book the author describes the essential elements that any effective ethics and compliance program should contain This book

is a source of information that connects yesterday with today The author shares observations and lessons of the past to suggest corporate leaders implement effective ethics and compliance programs to protect their organizations and themselves This book covers theories of ethics but with an eye focused on practical application Risks ethics and compliance are analyzed with an overall vision connected to the reality of business life without getting bogged down in abstract thinking or technical and regulatory details Ethics and compliance are disciplines that have increasingly achieved greater recognition in organizations Thus due to the importance of risk management in the business world and the necessary involvement of the CEO and the board of directors it seems appropriate that executives get access to this book about risks ethics compliance and human resources directed not only to compliance experts but also to any organizational leader This second edition offers various examples to cultivate ethical thinking and behavior identify common risks and comprehend their adverse effects on organizations

Parliamentary Debates India. Parliament. Rajya Sabha, Proceedings of the Conference on Artificial Insemination of Beef Cattle ,1976 *The Evolution of Artificial Intelligence in Higher Education* Miltiadis D. Lytras,Afnan Alkhaldi,Sawsan Malik,Andreea Claudia Șerban,Tahani Aldosemani,2024-11-25 The Evolution of Artificial Intelligence in Higher Education is a comprehensive guide to the transformative potential of AI in the higher education landscape focused on the need to nurture technology literacy among educators and learners **Hoard's Dairyman** ,1958 **American Economist** ,1895 *Congressional Record* United States.
