Mfs Desalination Process:

Current Trends and Future Developments on (Bio-) Membranes Angelo Basile, Evangelos P. Favvas, 2023-11-21 Modern Approaches in Membrane Technology for Gas Separation and Water Treatment presents condensed information on novel and promising membrane materials. The book answers some major questions from the membrane community about three promising materials that are to be introduced at industrial scale. It introduces recent out of the box ideas concerning the application of new methods capable to enhance the membrane separation efficiency. Sections cover potential commercialization, important question on three famous membrane materials and new approaches in membrane technology. Finally the book describes and discusses three novel ideas about the potential effect of the magnetic field on membrane separation efficiency, the use of cryogenic technology on membrane separations and the use of nanobubble technology on water membrane processes. Focuses on the necessity for environmental friendly and cost effective purification and separation process. Lists all new membrane materials suitable for commercialization. Presents new modern approaches and ideas for improving the membrane efficiency.

Desert Development: Socio-economic aspects and renewable energy applications Adli Bishay, Harold E. Dregne, 1991 This book focuses on the socio economic aspects of desert communities such as balancing economic and ecological issues, new and renewable energy strategies and nonconventional energy plans. Systems approaches, applications and case studies in developing nations are discussed. Nuclear Desalination, 1969 **Desalination Research Progress** Daniel J. Delgado, Pablo Moreno, 2008 As freshwater resources continue to decline as the population grows and development activities continue, desalination has taken on a sense of urgency. Desalination refers to any of several processes that remove excess salt and other minerals from water. Desalination may also refer to the removal of salts and minerals more generally as in soil desalination. This book includes within its scope distillation, membranes, reverse osmosis, electrodialysis, ion exchange, freezing, water purification and water reuse and wastewater treatment. This new volume examines new research in this frontier field.
