Name:

Lab Section:

Lab Exercise Name and Number:

1. Question/Purpose/Problem:

What is the purpose of this experiment? Are you trying to solve a problem? What is the problem? Trying to answer a question? What is the question? Trying to observe something? What are you trying to observe?

2. Hypothesis:

What do you think the results of your experiment will be, and why do you think that?

3. Procedure/Materials:

Give a brief overview on how you are going to solve, answer, or observe whatever you wrote about in question 1. This doesn't have to be step by step instructions, just write a describe what you will be doing and what materials you will be using in this experiment, and how it will accomplish your goal(s).

4. Results:

Give the results of your experiment. What data did you collect? This may include tables, charts, and/or figures.

5. Conclusions:

What conclusions can you draw from the data you collected? Did your experiment accomplish what it was supposed to? If yes: what was the end result? If your experiment didn't work, why do you think that was? What could you have done differently, if anything?
