Remote Sensing Handbook, Volume II Prasad S. Thenkabail,2024-11-29 Volume II of the Six Volume Remote Sensing Handbook Second Edition is focused on digital image processing including image classification methods in land cover and land use It discusses object based segmentation and pixel based image processing algorithms change detection techniques and image classification for a wide array of applications including land use land cover croplands urban studies processing hyperspectral remote sensing data thermal imagery light detection and ranging LiDAR geoprocessing workflows frontiers of GIScience and future pathways This thoroughly revised and updated volume draws on the expertise of a diverse array of leading international authorities in remote sensing and provides an essential resource for researchers at all levels interested in using remote sensing It integrates discussions of remote sensing principles data methods development applications and scientific and social context Features Provides the most up to date comprehensive coverage of digital image processing Highlights object based image analysis OBIA and pixel based classification methods and techniques of digital image processing Demonstrates practical examples of image processing for a myriad of applications such as land use land cover croplands and urban Establishes image processing using different types of remote sensing data that includes multispectral radar LiDAR thermal and hyperspectral Highlights change detection geoprocessing and GIScience This volume is an excellent resource for the entire remote sensing and GIS community Academics researchers undergraduate and graduate students as well as practitioners decision makers and policymakers will benefit from the expertise of the professionals featured in this book and their extensive knowledge of new and emerging trends Object-Based Image Analysis Thomas Blaschke,Stefan Lang,Geoffrey Hay,2008-08-09 This book brings together a collection of invited interdisciplinary persp tives on the recent topic of Object based Image Analysis OBIA Its c st tent is based on select papers from the 1 OBIA International Conference held in Salzburg in July 2006 and is enriched by several invited chapters All submissions have passed through a blind peer review process resulting in what we believe is a timely volume of the highest scientific theoretical and technical standards The concept of OBIA first gained widespread interest within the GIScience Geographic Information Science community circa 2000 with the advent of the first commercial software for what was then termed obje oriented image analysis However it is widely agreed that OBIA builds on older segmentation edge detection and classification concepts that have been used in remote sensing image analysis for several decades Nevert less its emergence has provided a new critical bridge to spatial concepts applied in multiscale landscape analysis Geographic Information Systems GIS and the synergy between image objects and their radiometric char teristics and analyses in Earth Observation data EO Remote Sensing Handbook - Three Volume Set Prasad Thenkabail,2018-10-03 A volume in the three volume Remote Sensing Handbook series Remote Sensing of Water Resources Disasters and Urban Studies documents the scientific and methodological advances that have taken place during the last 50 years The other two volumes in the series are Remotely Sensed Data Characterization

Classification and Accuracies and Land Reso *Use of the Normalized Difference Vegetation Index (NDVI) to Assess Land Degradation at Multiple Scales* Genesis T. Yengoh,David Dent,Lennart Olsson,Anna E. Tengberg,Compton J. Tucker III,2015-11-11 This report examines the scientific basis for the use of remotely sensed data particularly Normalized Difference Vegetation Index NDVI primarily for the assessment of land degradation at different scales and for a range of applications including resilience of agro ecosystems Evidence is drawn from a wide range of investigations primarily from the scientific peer reviewed literature but also non journal sources The literature review has been corroborated by interviews with leading specialists in the field The report reviews the use of NDVI for a range of themes related to land degradation including land cover change drought monitoring and early warning systems desertification processes greening trends soil erosion and salinization vegetation burning and recovery after fire biodiversity loss and soil carbon This SpringerBrief also discusses the limits of the use of NDVI for land degradation assessment and potential for future directions of use A substantial body of peer reviewed research lends unequivocal support for the use of coarse resolution time series of NDVI data for studying vegetation dynamics at global continental and sub continental levels There is compelling evidence that these data are highly correlated with biophysically meaningful vegetation characteristics such as photosynthetic capacity and primary production that are closely related to land degradation and to agroecosystem resilience New West Indian guide ,2004 **The Official Railway Guide** ,1874 **Remotely Sensed Data Characterization, Classification, and Accuracies** Ph.D., Prasad S. Thenkabail,2015-10-02 A volume in the Remote Sensing Handbook series Remotely Sensed Data Characterization Classification and Accuracies documents the scientific and methodological advances that have taken place during the last 50 years The other two volumes in the series are Land Resources Monitoring Modeling and Mapping with Remote Sensing and Remote Sensing of Water Resources Disasters and Urban Studies This volume demonstrates the experience utility methods and models used in studying a wide array of remotely sensed data characterization classification and accuracies for terrestrial applications Leading experts on global geographic coverage study areas and array of satellite and sensors contribute to this unique handbook This theoretical as well as highly practical book represents a thorough history of advancement in the field over last 50 years bringing us to where we are now and highlighting future possibilities Highlights include Fundamental and advanced topics in remote sensing satellites and sensors Remote sensing data calibration normalization harmonization and synthesis Optical Radar LiDAR thermal hyperspectral and other satellite sensors normalization of remotely sensed data and data degradations Digital image processing urban image classification and image classification methods in land use land cover cropland change detection studies Enhanced vegetation indices and standardization of vegetation indices Object based image analysis OBIA and geospatial data integration LiDAR data processing and applications Geoprocessing GIS and GIScience GNSS applications Crowdsourcing and cloud computing Google Earth for Earth Sciences Map accuracies Remote sensing law or space law and a host of other topics *New*
