

# PERSONALITY TESTING IN HIRING

## What are personality tests?

Personality tests are a type of pre-employment tests that **help evaluate the candidate's character traits** to better understand their values, motivation, and common behaviors.

## Why test candidate personality?

Learn more about their:

- Collaboration preferences
- Working style
- Intrinsic motivation
- Character traits

## *The problem with personality testing*

### Personality testing does not predict future job performance.

By fixating on personality too much, hiring managers can overlook other predictive elements of stable job performance — team composition, employee motivation, and culture fit.

### So how to use them?

Because personality tests draw inconclusive results and are easy to fake, it's best to use them in **combination with soft skills assessments, technical skills assessments, cognitive ability tests, and behavioral interviewing**.

**Business Personality and Ability** Charles J. Krauskopf, David Robertson, Saunders, 1994 This book presents a theory of individual differences and personality along with research support and applications. The authors base the measuring construct on Wechsler scales, evaluating in what ways the differences in structural and developed aptitudes cause what we refer to as personality. In the tradition of Henry Murray, they combine the tough minded, highly rigorous quantitative analysis of measures with the tender minded clinical judgement of interpretive information and environmental influence.
