## Perspectives On An Evolving Creation:

**Perspectives on an Evolving Creation** Keith B. Miller, 2003-09-25 According to the authors of this book who explore evolutionary theory from a clear Christian perspective the common view of conflict between evolutionary theory and Christian faith is mistaken. Written by contributors representing the natural sciences philosophy theology and the history of science this thought provoking work is informed by both solid scientific knowledge and keen theological insight. The three sections of the book address 1 relevant biblical historical and scientific background 2 the scientific evidence for an evolving creation and 3 theological issues commonly raised in connection with evolution including the nature of God's creative activity the meaning of the miraculous and the uniqueness of humankind. Woven through the volume are short meditations designed to direct readers toward worshiping the God of providence. Contributors: Laurie J Braaten, Warren S Brown Jr, David Campbell, Robin Collins, Edward B Davis, Terry M Gray, Jeffrey K Greenberg, Deborah B Haarsma, Loren Haarsma, James P Hurd, Conrad Hyers, David N Livingstone, Keith B Miller, John C Munday Jr, George L Murphy, Mark A Noll, Robert John Russell, Howard J Van Till, David L Wilcox, Jennifer Wiseman.

**Three Views on Creation and Evolution** Zondervan, 2010-06-01 For Christians the issues raised by the different views on creation and evolution are challenging. Can a young earth be reconciled with a universe that appears to be billions of years old? Does scientific evidence point to a God who designed the universe and life in all its complexity? *Three Views on Creation and Evolution* deals with these and similar concerns as it looks at three dominant schools of Christian thought. Proponents of young earth creationism, old earth creationism, and theistic evolution each present their different views, tell why the controversy is important, and describe the interplay between their understandings of science and theology. Each view is critiqued by various scholars, and the entire discussion is summarized by Phillip E Johnson and Richard H Bube. The *Counterpoints* series provides a forum for comparison and critique of different views on issues important to Christians. *Counterpoints* books address two categories: Church Life and Bible and Theology. Complete your library with other books in the *Counterpoints* series.

**Four Views on Creation, Evolution, and Intelligent Design** Zondervan, 2017-11-21 Evolution or the broader topic of origins has enormous relevance to how we understand the Christian faith and how we interpret Scripture. *Four Views on Creation, Evolution, and Intelligent Design* presents the current state of the conversation about origins among evangelicals representing four key positions: Young Earth Creationism, Ken Ham; Answers in Genesis; Old Earth Progressive Creationism, Hugh Ross; Reasons to Believe; Evolutionary Creation, Deborah B Haarsma; BioLogos; Intelligent Design, Stephen C Meyer; The Discovery Institute. The contributors offer their best defense of their position addressing questions such as: What is your position on origins understood broadly to include the physical universe, life and human beings in particular? What do you take to be the most persuasive arguments in defense of your position? How do you demarcate and correlate evidence about origins from current science and from divine revelation? What hinges on answering these questions correctly? This book allows each contributor to not only present the case for his or her view but also to critique and respond to

the critiques of the other contributors allowing you to compare their beliefs in an open forum setting to see where they overlap and where they differ [Back To Darwin](#) John B. Cobb,2008-02-04 This book provides a distinctive radical way beyond the quarrels between evolutionary science and Christian belief Leading scientists philosophers and theologians critically discuss the metaphysical assumptions of neo Darwinism and offer concrete ways of broadening mainstream evolutionary theory Their open exchange moderated by veteran process theologian John B Cobb presents a holistic case for evolution that both theists and nontheists can accept Contributors Francisco J Ayala Ian G Barbour Charles Birch Philip Clayton John B Cobb Jr John Greene David Ray Griffin A Y Gunter John F Haught Lynn Margulis Reg Morrison Dorion Sagan Jeffrey Schloss Robert J Valenza Howard J Van Till **Evolutionary Creation** Denis O. Lamoureux,2008-06-15 In this provocative book evolutionist and evangelical Christian Denis O Lamoureux proposes an approach to origins that moves beyond the evolution versus creation debate Arguing for an intimate relationship between the Book of God s Words and the Book of God s Works he presents evolutionary creation a position that asserts that the Father Son and Holy Spirit created the universe and life through an ordained and sustained evolutionary process This view of origins affirms intelligent design and the belief that beauty complexity and functionality in nature reflect the mind of God Lamoureux also challenges the popular Christian assumption that the Holy Spirit revealed scientific and historical facts in the opening chapters of the Bible He contends that Scripture features an ancient understanding of origins that functions as a vessel to deliver inerrant and infallible messages of faith Lamoureux shares his personal story and his struggle in coming to terms with evolution and Christianity Like many he lost his boyhood faith at university in classes on evolutionary biology After graduation he experienced a born again conversion and then embraced belief in a literal six day creation Graduate school training at the doctoral level in both theology and biology led him to the conclusion that God created the world through evolution Lamoureux closes with the two most important issues in the origins controversy the pastoral and pedagogical implications How should churches approach this volatile topic And what should Christians teach their children about origins

*Perspectives on Science and Christian Faith* ,2007 **An Exploration of Christian Theology** Don Thorsen,2020-04-21 This introduction to Christian theology explores the whole Christian tradition in a simple and straightforward way Leading Wesleyan theologian Don Thorsen surveys the theological views represented within historic Christianity and discusses the variety of positions held without favoring one over another The book includes helpful end of chapter questions for further reflection and discussion a convenient glossary of theological terms and sidebars The second edition is marked by a thorough updating of the text and the addition of two new chapters on apologetics and the future of the unevangelized **A Christian Perspective on Creation Vs. Evolution** Michael L. McCoy,1996 **An Evolutionary Approach to Jesus of Nazareth** Juan Luis Segundo,1988 [Origins](#) Deborah B. Haarsma,Loren D. Haarsma,2011 When it comes to the history of the universe many believe that science and faith are mutually exclusive But in this revised version of Origins physics professors

Loren and Deborah Haarsma explore what God's Word and God's world teach us about creation evolution and intelligent design Clearly explaining the science the authors focus on areas where Christians agree They also present the strengths and weaknesses of areas where Christians differ Origins helps you develop a deeper understanding of the origins of the universe and sort out your own views on faith and science Small group discussion questions follow each chapter A companion website provides resources for further study **A Religious Journal of the School of Theology** ,2004 [Evolutionary Creation in Biblical and Theological Perspective](#) Dan Lioy,2011 This book undertakes a biblical and theological analysis of evolutionary creation and creation themes pertinent to origins science A key premise is that a fundamental congruity exists between what the Lord has revealed in nature i.e. the book of God's work and in Scripture i.e. the book of God's Word A corollary supposition is that based on an analysis of the fossil record genome evidence morphological data and so on biological evolution offers the best persuasive scientific explanation for the origin and actualization of carbon based life on earth including Homo sapiens i.e. modern humans Furthermore considering evolutionary creation in an objective balanced and informed manner reveals that the view is wholly compatible with classical theological metaphysics including Augustinian and Reformed confessional orthodoxy *The Future of the Christian Tradition* Robert Joseph Miller,2007 What is the future of the Christian tradition as it confronts the challenges and opportunities of the global age That question addressed by authors from around the globe leads in turn to more questions What elements of a traditional Christian faith can be carried forward in an authentic contemporary faith The Bible as Sacred Scripture Life after death Sin and guilt Reward and punishment How do we make an earth centered vision the heart of a faith for the second axial age And many more Contributors include John Shelby Spong Episcopal Bishop Emeritus of Newark New Jersey Robert W Funk Founder of the Jesus Seminar Eugenie Scott Director of the Center for Science Education Richard Holloway Bishop of Edinburgh Lloyd Geering Emeritus Professor of Victoria University of Wellington New Zealand Don Cupitt former Dean of Emmanuel College Cambridge England Anne Primavesi Fellow of the Centre for the Interdisciplinary Study of Religion Birkbeck College University of London and Fellows of the Jesus Seminar

[Science and Religion in Dialogue](#) Melville Y. Stewart,2010 **Creationism and the Conflict over Evolution** Tatha Wiley,2009-06-25 How do our current notions of the workings of the universe fit with our deepest convictions about its meaning and value From religion we grasp the world as created given gift From science we apprehend it as evolving in process changing How do we bring these apprehensions together Or can we Is our impulse to find the two complementary creation and evolution Or is it to find them contradictory creation or evolution From the Preface The way in which we answer these questions carries personal and intellectual consequences It will constitute the first piece in a worldview within which we order our religious beliefs and scientific judgments **Christian Scholar's Review** ,2007 **Darwinian Conservatism** Larry Arnhart,2009 A reprint of Larry Arnhart's essay Darwinian Conservatism this edition features comments and criticism from a variety of contributors **Creation and the Origin of Species** Matthew McClure,Matthew

R McClure Ph D,2018-04-13 This book provides an overview of evolution creation models and intelligent design and offers a comprehensive biblically based viewpoint of evolutionary theory earth history and of the relationship between creation and science

**Evangelicals and Science** Michael Roberts,2008-03-30 Most people when they think about the purported conflict between science and religion would most likely think first of evangelical Protestantism Because of the prominent place evolution versus creationism and such events as the Scopes Trial has had in the debates over science and religion many people think of evangelicals as hostile to science As with other volumes in the Greenwood Guides to Science and Religion series this work addresses the more complex interworkings between modern science and evangelical Christianity

Evangelicals and Science provides a thorough overview of the history of the relationship between these two dominant forces in public life including chapters on evangelicals the Bible and science evangelicals and geology the rise of Creationism and evangelicals and modern science The volume includes primary source documents to give readers a flavor of the writings of evangelicals on science a timeline and an annotated bibliography From publisher s description

Christology and Science F. LeRon Shults,2008 The dialogue between theology and science has blossomed in recent decades but particular beliefs about Jesus Christ have not often been brought to the forefront of this interdisciplinary discussion even in explicitly Christian contexts This book breaks new ground by explicitly bringing the specific themes of Christology into dialogue with contemporary science It engages recent developments in late modern philosophy of science in order to articulate the Christian beliefs about Jesus Christ in a way that responds to challenges and opportunities that have arisen in light of various scientific discoveries The main chapters deal with Incarnation Atonement and Parousia After a brief treatment of the history of the shaping of these ideas the author traces developments in some of the sciences that have challenged these formulations evolutionary biology cultural anthropology and physical cosmology Each chapter also summarises some of the popular constructive responses to these developments After clarifying the way in which the Christian understanding of God and of humanity shape the task of reforming Christology each chapter concludes with a programmatic outline of ways in which we might articulate the identity agency and presence of Jesus Christ in dialogue with late modern science and culture
