Rossmore, 1994-12-31 My professional interest in antimicrobial agents and contamination control goes back 50 years to my tour as a microbiologist in a field hospital in Europe during World War II With no experience and relying solely on a military handbook I prepared thermometer trays with jars of blue bichloride of mercury and pink isopropyl alcohol A preliminary typhoid diagnosis of one of our cooks resulted in the need for lab testing His stool specimen and its subsequent disposal was my problem My handbook said bum it So burn it I did in a five gallon can with gasoline Flames shot up almost six feet and my next mistake was to extinguish them with carbon tetrachloride This resulted in the production of lethal phosgene gas The hospital had a near disaster I could say that at that moment I vowed to write a how to book so that such stupidities could be avoided Nevertheless when I was offered the opportunity to edit this book I thought back on the need for a real practical treatment of my subject This book then is a practical handbook for technical service personnel and scientists who are not necessarily specialists in microbiology It provides information on suitable antimicrobial agents appropriate to their particular problem solving needs and information on the microbial groups contributing to the specific problem their ecologies and strategies for controlling their access to the area or material of interest The Cosmetic Industry Estrin, 2019-07-09 This book summarizes the authority of regulatory agencies and programs as they pertain to the cosmetic industry offers practical advice on how to operate within the regulatory environment and introduces scientific and regulatory issues that are likely to have an impact on cosmetic manufacturers This interesting volume reports all the novel technologies in use to study and control the cosmetic products in order to make them effective and free of side effects Journal of Applied Cosmetology 2000 **On a Sustainable Future of the Earth's Natural Resources** Mu.
