**Objects of Knowledge** Susan Pearce, 2010-07-15 Volume 1 in a series designed to act as a forum for the dissemination and discussion of new research currently being undertaken in the field of Museum Studies The series aims to cover the whole museum field and to broadly address the history and operation of the museum as a cultural phenomenon The papers published are of a high academic standard and are also intended to relate directly to matters of immediate museum concern The publication aims to fill a major gap in the present scope of museum based literature This volume is concerned with the ways in which meaning is created through museum objects and the processes which this involves The papers however adopt a wide diversity of stances ranging widely across the field some take a broadly theoretical line and others examine specific areas like museum education and the relationship of museums to native peoples The volume concludes with a Review Section covering recent books exhibitions and conferences

Nature and culture Samuel J. M. M. Alberti, 2017-10-03 This is a vital new work the first to take the University of Manchester's Museum as its subject By setting the museum in its cultural and intellectual contexts Nature and culture explores twentieth century collecting and display and the status of the object in the modern world Beginning with the origins of the Manchester Museum accounting for its development as an internationally renowned university museum and concluding at its major expansion at the turn of the millennium this book casts new light on the history of museums How did objects become knowledge Who encountered museum objects on their way to museums What happened to collections within the museum How did visitors use and respond to objects In answering these questions Nature and culture illuminates not only the history of one institution but also contributes to wider discussions in the history of science cultural history and museology

**Making Early Histories in Museums** Nick Merriman, 1999 This text examines the debate about interpretation and making history in the context of archaeological museums the reliance of those working on the early periods of the past on the fragmentary information provided by archaeology as well as an imperfect documentary record brings its own interpretative challenges While much has been written in the context of archaeological theory about the partiality and subjectivity of archaeologists interpretations of the past less has been written about the implications of this for the interpretations of archaeology by a non specialist audience in museums As a result the past presented in archaeological museums has tended to follow a traditional and uncritical model
