

# Nursing MATH

Complete essentials for the student or professional math basics, measurement conversions, dosage calculations, vital signs, body-related calculations, health care operating indicators, condition specific calculations & calculating risk.

## BASICS

### Positive & Negative Numbers

- **Positive numbers** are greater than 0 (to the right of 0 on a number line) and get larger as you move farther away from 0; they may be written with or without a + sign (EQ:  $4$  or  $+4$ )
- **Negative numbers** are less than 0 (to the left of 0 on a number line) and get smaller as you move farther away from 0; they must be written with a - sign (EQ:  $-5$ )

### RULES FOR ADDITION

- The sum of two positive numbers is a positive number  
EQ:  $3 + 4 = 7$
- The sum of two negative numbers is a negative number  
EQ:  $-2 + -6 = -8$
- The sum of one positive number and one negative number may be positive or negative, depending on which is larger, but remember that adding a negative number is the same as subtracting that number  
EQ:  $9 + (-2) = 9 - 2 = 7$      $-9 + 2 = 2 - 9 = -7$

### RULES FOR SUBTRACTION

- Think of subtraction as addition of the opposite; so, first change the subtraction sign to an addition sign, and write the opposite of the original number being subtracted and solve as usual  
EQ:  $3 - 8 = 3 + (-8) = -5$      $5 - (-2) = 5 + 2 = 7$

### RULES FOR MULTIPLICATION

- The product of two positive numbers is a positive number  
EQ:  $3 \times 4 = 12$
- The product of two negative numbers is a positive number  
EQ:  $(-3) \times (-4) = 12$
- The product of one positive number and one negative number is a negative number  
EQ:  $4 \times (-7) = -28$

### RULES FOR DIVISION

- The quotient of two positive numbers is a positive number  
EQ:  $9 \div 3 = 3$
- The quotient of two negative numbers is a positive number  
EQ:  $(-20) \div (-4) = 5$
- The quotient of one positive number and one negative number is a negative number  
EQ:  $40 \div (-5) = -8$      $(-20) \div 4 = -5$

### DISTRIBUTIVE PROPERTY

- A rule used in mathematics states that  $a(b + c) = ab + ac$ , or that  $a(b - c) = ab - ac$ ; in other words, the first term outside the parentheses must be distributed to, or multiplied by, each term inside the parentheses.  
Remember to use the rules for multiplying negative and positive numbers if negative numbers are included in the expression  
EQ:  $5(x + 2) = 5x + 10$      $-6(x + 7) = 6x + 34$      $-5(x - 5) = -5x + 25$

### Fractions

- Fractions represent parts of a whole; they are another way of showing division
- The top number is called the **numerator**, and the bottom number is called the **denominator**
- There are three types of fractions:
  - **Proper fraction:** The numerator is less than the denominator:  $\frac{3}{14}$
  - **Improper fraction:** The numerator is greater than or equal to the denominator:  $\frac{7}{5}$
  - **Mixed number:** Consists of a whole number and a fraction part:  $1\frac{1}{4}$
- **Lowest terms:** Putting a fraction in a form so that the only common factor between the numerator and denominator is 1; also called **reducing a fraction** or writing it in **reduced form**  
EQ:  $\frac{6}{12}$ : the numerator and denominator have a common factor of 6, so divide each by 6 to put it in lowest terms:  $\frac{1}{2}$ ; now their only common factor is 1, so this is lowest terms

**NOTE:** Fractions that have the same value (e.g., a fraction and that same fraction in lowest terms) are called **equivalent fractions**

### FINDING THE LEAST COMMON DENOMINATOR (LCD)

- The LCD is the smallest number into which two or more denominators will divide evenly; this number is useful for performing operations (especially addition) subtracted with fractions  
EQ: Given the fractions  $\frac{1}{3}$  and  $\frac{1}{4}$ , what is the LCD?  
Think about the smallest number that is divisible by both 3 and 4; in this case, it is  $3 \times 4 = 12$ , so multiply each of the numerators and denominators by whatever is needed to make each denominator equal to 20:  
 $\frac{1}{3} \times \frac{4}{4} = \frac{4}{12}$  and  $\frac{1}{4} \times \frac{3}{3} = \frac{3}{12}$ . The LCD is 12

### ADDING FRACTIONS

- If the fractions have the **same denominator**:
  1. Add the numerators; the denominator stays the same
  2. Write the fraction in reduced form, if necessary  
EQ:  $\frac{1}{3} + \frac{2}{3} = \frac{1+2}{3} = \frac{3}{3}$ ; since the numerator and denominator are both divisible by 3, reduce the fraction:  $\frac{3}{3} = 1$
- If the fractions have **different denominators**:
  1. Find the LCD and write equivalent fractions for each fraction using the LCD
  2. Add the numerators; the denominator stays the same
  3. Write the fraction in reduced form, if necessary  
EQ:  $\frac{1}{3} + \frac{1}{4}$ : the LCD is 12, so rewrite equivalent fractions with a denominator of 12:  $\frac{1}{3} \times \frac{4}{4} = \frac{4}{12}$  and  $\frac{1}{4} \times \frac{3}{3} = \frac{3}{12}$ ; then add the numerators:  $\frac{4+3}{12} = \frac{7}{12}$ ; since it can be reduced by writing as a mixed number:  $\frac{7}{12} = 1\frac{7}{12}$

### SUBTRACTING FRACTIONS

- If the fractions have the **same denominator**:
  1. Subtract the numerators; the denominator stays the same
  2. Write the fraction in reduced form, if necessary  
EQ:  $\frac{5}{11} - \frac{2}{11} = \frac{5-2}{11} = \frac{3}{11}$ ; since the greatest common factor of the numerator and denominator is 1, the fraction is already in reduced form
- If the fractions have **different denominators**:
  1. Find the LCD and write equivalent fractions for each fraction using the LCD
  2. Subtract the numerators; the denominator stays the same
  3. Write the fraction in reduced form, if necessary  
EQ:  $\frac{3}{4} - \frac{1}{2}$ : the LCD is 4, so rewrite equivalent fractions with a denominator of 4:  $\frac{3}{4} \times \frac{1}{1} = \frac{3}{4}$  and  $\frac{1}{2} \times \frac{2}{2} = \frac{2}{4}$ ; then subtract the numerators:  $\frac{3-2}{4} = \frac{1}{4}$ ; since the greatest common factor of the numerator and denominator is 1, the fraction is already in reduced form

### MULTIPLYING FRACTIONS

- 1. Write all numbers (even whole numbers or mixed numbers) in fraction form
- 2. Multiply the numerators, then multiply the denominators
- 3. Write the results in fraction form, then write the fraction in reduced form  
EQ:  $\frac{1}{4} \times 2\frac{3}{4}$ : first, write all numbers in fraction form:  $\frac{1}{4} \times \frac{11}{4}$ ; then multiply the numerators:  $1 \times 11 = 11$ ; then multiply the denominators:  $4 \times 4 = 16$ ; then write the results in fraction form:  $\frac{11}{16}$ ; and finally reduce, since each number is divisible by 1, divide each by 1:  $\frac{11}{16} = \frac{11}{16}$

### DIVIDING FRACTIONS

- 1. Write all numbers (even whole numbers or mixed numbers) in fraction form
- 2. Change the division sign to a multiplication sign
- 3. Write the **reciprocal** of the second fraction (reciprocals are found by inverting, or flipping, the fraction, so that the numerator is on the bottom and the denominator is on the top)
- 4. Multiply the numerators, then multiply the denominators
- 5. Write the results in fraction form, then write the fraction in reduced form  
EQ:  $\frac{3}{4} \div \frac{2}{5}$ : the numbers are both already in fraction form, so change the division sign to a multiplication sign and write the reciprocal of the second fraction:  $\frac{3}{4} \times \frac{5}{2}$ ; then multiply the numerators:  $3 \times 5 = 15$ ; multiply the denominators:  $4 \times 2 = 8$ ; then write the results in fraction form:  $\frac{15}{8}$ , or as a mixed number:  $1\frac{7}{8}$

### CONVERTING FRACTIONS TO DECIMALS

- 1. Write all numbers (even whole numbers or mixed numbers) in fraction form
- 2. Divide the numerator by the denominator, and add a zero in front of the decimal point, if necessary  
EQ:  $1\frac{1}{2}$ : since it is a mixed number, write it in fraction form:  $\frac{3}{2}$ ; then divide 12 by 10 to get 1.2; since there is already a number in the left of the decimal point, there is no need to write the zero in front of it

### CONVERTING FRACTIONS TO PERCENTAGES

- 1. Convert the fraction to a decimal (as explained above)
- 2. Round the decimal to the nearest hundredth
- 3. Multiply by 100 and add the percent sign (%)  
EQ:  $\frac{3}{4}$ : it is already in fraction form, so just divide 3 by 4 to get 0.75; then multiply by 100 to get the nearest hundredth: 0.75, then multiply by 100 and add the percent sign: 75%

### **Nursing Math Quick Study Academic Introduction**

Nursing Math Quick Study Academic Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Nursing Math Quick Study Academic Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Nursing Math Quick Study Academic : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Nursing Math Quick Study Academic : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Nursing Math Quick Study Academic Offers a diverse range of free eBooks across various genres. Nursing Math Quick Study Academic Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Nursing Math Quick Study Academic Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Nursing Math Quick Study Academic, especially related to Nursing Math Quick Study Academic, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Nursing Math Quick Study Academic, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Nursing Math Quick Study Academic books or magazines might include. Look for these in online stores or libraries. Remember that while Nursing Math Quick Study Academic, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Nursing Math Quick Study Academic eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or

publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Nursing Math Quick Study Academic full book, it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Nursing Math Quick Study Academic eBooks, including some popular titles.

### **FAQs About Nursing Math Quick Study Academic Books**

1. Where can I buy Nursing Math Quick Study Academic books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Nursing Math Quick Study Academic book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Nursing Math Quick Study Academic books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Nursing Math Quick Study Academic audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media

or recommend them to friends.

9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Nursing Math Quick Study Academic books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
