Algorithms of Anxiety Anthony Elliott,2024-07-09 Machine learning algorithms are widely presumed to herald a world in which the crippling burdens of anxiety can be left behind The digital revolution promises a brave new world where individuals communities and organizations can at last take control of the future anticipating designing and commanding the future possibly even with mathematical exactitude Yet paradoxically algorithms have unleashed widespread fears and forebodings

about the impact of digital technologies. Whether it's worries about unemployment, distress about social media's harmful effects on teenagers, or the fear of intrusive digital surveillance, we live in an age of turbo charged anxiety where the prophecies of algorithms are increasingly enmeshed with fundamental disruption and anxieties about the future. In this book, Anthony Elliott examines how machine learning algorithms are not only transforming global institutions but also rewriting our personal lives. He tells this story through a wide ranging analysis which takes in ChatGPT, Amazon, the Metaverse, Martin Ford, Netflix, Uber, Bernard Stiegler, Squid Game, Kate Crawford, LaMDA, Byung Chul Han, autonomous drones, Jean Baudrillard, and the automation of warfare. Questioning why people often assume that they need to adopt new technologies in order to lead fulfilling lives, Elliott argues that people may be as much entranced as inspired by their outsourcing of personal decision making to smart machines.
