Desktop GIS Gary E. Sherman, 2008 Desktop GIS explores the world of Open Source GIS software and provides a guide to navigate the many options available Strategies for choosing a platform selecting the right tools integration managing change and getting support are presented *Beginning MapServer* Bill Kropla, 2006-11-05 Beginning MapServer Open Source GIS Development is the first book of its kind It offers a comprehensive introduction to MapServer the development platform for integrating mapping technology into Internet applications You ll learn how to build and extend dynamic applications using popular languages like PHP Perl and Python After a thorough introduction to installation and configuration you ll uncover basic MapServer topics and examples You ll also learn about advanced MapServer features and how to query and incorporate dynamic data into your application The book culminates with the creation of an actual mapping application

Tangible Modeling with Open Source GIS Anna Petrasova, Brendan Harmon, Vaclav Petras, Payam Tabrizian, Helena Mitasova, 2018-05-11 This book provides an overview of the latest developments in the fast growing field of tangible user interfaces It presents a new type of modeling environment where the users interact with geospatial data and simulations using 3D physical landscape model coupled with 3D rendering engine Multiple users can modify the physical model while it is being scanned providing input for geospatial analysis and simulations The results are then visualized by projecting images or animations back on the physical model while photorealistic renderings of human views are displayed on a computer screen or in a virtual reality headset New techniques and software which couple the hardware set up with open source GRASS GIS and Blender rendering engine make the system instantly applicable to a wide range of applications in geoscience education landscape design computer games stakeholder engagement and many others This second edition introduces a new more powerful version of the tangible modeling environment with multiple types of interaction including polymeric sand molding placement of markers and delineation of areas using colored felt patches Chapters on coupling tangible interaction with 3D rendering engine and immersive virtual environment and a case study integrating the tools presented throughout this book demonstrate the second generation of the system Immersive Tangible Landscape that enhances the modeling and design process through interactive rendering of modeled landscape This book explains main components of Immersive Tangible Landscape System and provides the basic workflows for running the applications The fundamentals of the system are followed by series of example applications in geomorphometry hydrology coastal and fluvial flooding fire spread landscape and park design solar energy trail planning and others Graduate and undergraduate students and educators in geospatial science earth science landscape architecture computer graphics and games natural resources and many others disciplines will find this book useful as a reference or secondary textbook Researchers who want to build and further develop the system will most likely be the core audience but also anybody interested in geospatial modeling applications hazard risk management hydrology solar energy coastal and fluvial flooding fire spread landscape and park design will want to purchase

this book Open Source GIS Markus Neteler, Helena Mitasova, 2002-06-30 Open Source GIS A GRASS GIS Approach was written for experienced GIS users who want to learn GRASS as well as for the Open Source software users who are GIS newcomers Following the Open Source model of GRASS the book includes links to sites where the GRASS system and on line reference manuals can be downloaded and additional applications can be viewed The project s website can be reached at <http://grass.itc.it> and a number of mirror sites worldwide Open Source GIS A GRASS GIS Approach provides basic information about the use of GRASS from setting up the spatial database through working with raster vector and site data to image processing and hands on applications This book also contains a brief introduction to programming within GRASS encouraging the new GRASS development The power of computing within Open Source environment is illustrated by examples of the GRASS usage with other Open Source software tools such as GSTAT R statistical language and linking GRASS to MapServer Open Source GIS A GRASS GIS Approach is designed to meet the needs of a professional audience composed of researchers and practitioners in industry and graduate level students in Computer Science and Geoscience

Open Source GIS Markus Neteler, Helena Mitasova, 2007-10-23 With this third edition of Open Source GIS A GRASS GIS Approach we enter the new era of GRASS6 the first release that includes substantial new code developed by the International GRASS Development Team The dramatic growth in open source software libraries has made the GRASS6 development more efficient and has enhanced GRASS interoperability with a wide range of open source and proprietary geospatial tools Thoroughly updated with material related to the GRASS6 the third edition includes new sections on attribute database management and SQL support vector networks analysis lidar data processing and new graphical user interfaces All chapters were updated with numerous practical examples using the first release of a comprehensive state of the art geospatial data set Web Mapping Illustrated Tyler Mitchell, 2005-06-17 Web Mapping Illustrated shows readers how to create maps even interactive maps with free tools including MapServer OpenEV GDAL OGR and PostGIS It also explains how to find collect understand use and share mapping data

Open Source Archaeology Andrew T. Wilson, Ben Edwards, 2015-01-01 Open Source Archaeology Ethics and Practice brings together authors and researchers in the field of open source archaeology defined as encompassing the ethical imperative for open public access to the results of publicly funded research practical solutions to open data projects open source software applications in archaeology public information sharing projects in archaeology open GIS and the open context system of data management and sharing This edited volume is designed to discuss important issues around open access to data and software in academic and commercial archaeology as well as to summarise both the current state of theoretical engagement and technological development in the field of open archaeology Ben Edwards Ben Edwards was trained in archaeology at the University of Durham achieving his BA MA and PhD His first commercial work was for Archaeological Services Durham University before moving on to become a Lecturer in Archaeological Practice at the University of Liverpool where he taught for three years During this time Ben began his project

management work undertaking both commercial and research excavations and survey projects His teaching archaeological practice and heritage management proved to be an excellent basis from which to develop his professional expertise Ben now lectures at Manchester Metropolitan University in Archaeology and Heritage He currently researches open source software and hardware for use in the field and advanced 3D surveying techniques

Andrew Wilson Andrew Wilson was trained in archaeology at the University of Liverpool Upon achieving his BA at the University Andrew moved south to study Computer Applied Archaeology at the University of Southampton where he was awarded an MSc Andrew returned to the University of Liverpool where he has recently completed a PhD During this time Andrew coordinated a number of projects both in the UK and Middle East specialising in advanced surveying techniques of archaeological remains Working in the the School of Computer Science Bangor University Andrew has developed his keen interest in Open data policies and ethics This interest was the starting point for this volume

Research Anthology on Usage and Development of Open Source Software Management Association, Information Resources, 2021-06-25 The quick growth of computer technology and development of software caused it to be in a constant state of change and advancement This advancement in software development meant that there would be many types of software developed in order to excel in usability and efficiency Among these different types of software was open source software one that grants permission for users to use study change and distribute it freely Due to its availability open source software has quickly become a valuable asset to the world of computer technology and across various disciplines including education business and library science The Research Anthology on Usage and Development of Open Source Software presents comprehensive research on the design and development of open source software as well as the ways in which it is used The text discusses in depth the way in which this computer software has been made into a collaborative effort for the advancement of software technology Discussing topics such as ISO standards big data fault prediction open collaboration and software development this anthology is essential for computer engineers software developers IT specialists and consultants instructors librarians managers executives professionals academicians researchers and students

Learning GIS Using Open Source Software Kakoli Saha, Yngve K. Frøyen, 2021-12-07 This book introduces the usage functionality and application of data in geographic information systems GIS for geo spatial analysis It offers knowledge on GIS tools and techniques and explains how they can be applied in real world project to architects and planners in the Indian and the Greater South Asian context using open source software The volume explains concepts on planning and architectural tasks their data methods and requirements followed and includes GIS related exercises on the same tasks It takes the reader through the concepts of geo spatial analysis and its referencing system while quoting examples from India Further the content of the book will help the planners involved in preparing GIS based master planning for cities under the Atal Mission for Rejuvenation and Urban Transformation AMRUT scheme see Glossary for details A practical guidebook providing a step by step guide to learn open source GIS this book will be useful for students scholars and professionals from

the field of architecture and planning geography and other spatial sciences instructors of GIS courses on planning and architecture urban and regional planners transport planners urban design landscape architects environmental planners departments of town and country planning and development authorities It will also be useful for anyone interested in the geospatial analysis
