OpenIntro is a new project Statistics is our first book David Diez and Christopher Barr founded the OpenIntro project in 2009 to improve the quality and availability of education by producing introductory books and teaching tools that are free to use and easy to modify Since our first conversations the project has grown to include a group of core Fellows Filipp Brunshstejn Mine Çetinkaya Rob Gould and Meenal Patel and countless other collaborators Together our team hopes to lead a growing movement in open source education Our inaugural effort is OpenIntro Statistics First and foremost OpenIntro Statistics Preliminary Edition strives to be a complete introductory textbook of the highest caliber Its core derives from the classic notions of statistics education and is extended by recent innovations This our first release includes chapters in foundations of probability and statistical inference and also reflects the increasing interest in simulations and applied data analysis The approach is immersive and practical We are proud to make the book available in paperback for less than 7 dollars from amazon com and free in PDF from our homepage [openintro.org](http://openintro.org) Visit us often to track our progress and get involved David M Diez is a postdoctoral fellow and Christopher D Barr is an assistant professor both in the Department of Biostatistics at the Harvard School of Public Health Mine Çetinkaya is a graduating doctoral student in the Department of Statistics at UCLA

*OpenIntro Statistics* David M. Diez, Christopher D. Barr, Mine Çetinkaya-Rundel, 2011-07-20 THIS IS AN OLDER EDITION It continues to remain available for instructors who would like to continue using this edition though about 99% of our sales are from the Second Edition or our other new books The OpenIntro project was founded in 2009 to improve the quality and availability of education by producing introductory books and teaching tools that are free to use and easy to modify Together with the statistics education community OpenIntro hopes to lead a growing movement in open source education Our inaugural effort is OpenIntro Statistics The Preliminary Edition of OpenIntro Statistics used by early adopters at Harvard and Princeton has given way to the official First Edition With over 100 pages of new content the First Edition delivers an array of additional topics including data collection chi square testing and multiple regression While the book has expanded our core philosophy remains the same Probability is optional simulation is key and we feature real data whenever possible Most importantly files for the entire book are still freely available at [openintro.org](http://openintro.org) and anybody can purchase a paperback copy from amazon com for under 10 The future for OpenIntro depends on the involvement and enthusiasm of our community Visit our new website [openintro.org](http://openintro.org) The site offers free course management tools that include an online question bank utilities for creating course quizzes and other supplemental resources      **OpenIntro Statistics** David Diez, Christopher Barr, Mine Çetinkaya-Rundel, 2013-05-17 Note that this book has a different ISBN than the copies found on Amazon It is an official

version of OpenIntro Statistics but it is listed under a separate ISBN to allow lower pricing on CreateSpace for bulk or international orders All OpenIntro Statistics copies are sold royalty free The reason the price is lower here than on Amazon is that the fees for selling through CreateSpace are lower than through Amazon The downside is that buyers must pay for shipping on CreateSpace whereas shipping is often free on Amazon and the net price there tends to be the cost effective option for most buyers

**Statistics by Simulation** Carsten F. Dormann, Aaron M. Ellison, 2025-06-03 An accessible guide to understanding statistics using simulations with examples from a range of scientific disciplines Real world challenges such as small sample sizes skewed distributions of data biased sampling designs and more predictors than data points are pushing the limits of classical statistical analysis This textbook provides a new tool for the statistical toolkit data simulations It shows that using simulation and data generating models is an excellent way to validate statistical reasoning and to augment study design and statistical analysis with planning and visualization Although data simulations are not new to professional statisticians Statistics by Simulation makes the approach accessible to a broader audience with examples from many fields It introduces the reasoning behind data simulation and then shows how to apply it in planning experiments or observational studies developing analytical workflows deploying model diagnostics and developing new indices and statistical methods Covers all steps of statistical practice from planning projects to post hoc analysis and model checking Provides examples from disciplines including sociology psychology ecology economics physics and medicine Includes R code for all examples with data and code freely available online Offers bullet point outlines and summaries of each chapter Minimizes the use of jargon and requires only basic statistical background and skills
