## **Operationalizing Health Reform The Basics:**

*Operationalized Psychodynamic Diagnosis OPD-2* OPD Task Force, 2008-01-01 Operationalized Psychodynamic Diagnosis OPD is a form of multiaxial diagnostic and classification system based on psychodynamic principles analogous to those based on other principles such as DSM IV and ICD 10 The OPD is based on five axes I experience of illness and prerequisites for treatment II interpersonal relations III conflict IV structure and V mental and psychosomatic disorders in line with Chapter V F of the ICD 10 After an initial interview lasting 1 2 hours the clinician or researcher can evaluate the patient's psychodynamics according to these axes and enter them in the checklists and evaluation forms provided The new version OPD 2 has been developed from a purely diagnostic system to include a set of tools and procedures for treatment planning and for measuring change as well as for determining the appropriate main focuses of treatment and developing appropriate treatment strategies

**How to Operationalize Gender Issues in Country Work** International Monetary Fund. Strategy, Policy, & Review Department, 2018-06-13 Reducing gender gaps can have important economic benefits Gender gaps remain significant on a global scale both with respect to opportunities and outcomes For example gender based legal restrictions in many parts of the world as well as barriers in access to education healthcare and financial services prevent women from fully participating in the economy In turn labor force participation rates are lower among women than men Gender equality can play an important role in promoting economic stability by boosting economic productivity and growth enhancing economic resilience and reducing income inequality The Fund has begun operationalizing gender issues in its work Staff has contributed to the economic literature through country level and cross country analytical studies confirming the macro criticality of gender issues in a broad set of circumstances Gender issues are also increasingly becoming an integral part of capacity development through technical assistance and training And in country work two waves of gender pilots have been completed encompassing both surveillance and Fund supported programs and covering all regions of the world and all levels of income and a third wave is under way Coverage of gender issues in staff reports should be selective and calibrated to the degree of macroeconomic significance All teams should consider whether gender issues are relevant taking into account also the authorities priorities but with no presumption that gender issues will be covered everywhere or every year and with in depth coverage anticipated in only a limited number of cases any year Staff should point to macroeconomic significance where it exists with analysis focused on aspects with economic implications and specific policy advice limited to areas where there is Fund expertise Where relevant country teams should leverage external expertise This note provides an overview of good practices and resources available to staff The note is consistent with the 2015 Guidance Note for Surveillance Under Article IV Consultations and draws also on the 2013 Guidance Note on Jobs and Growth Issues in Surveillance and Program Work It provides examples of good practice with respect to coverage of gender issues in country reports and lays out the resources available to country teams both with respect to existing analytical work as well as the availability of data and tools

**In Search of Equity** Ronald Bayer, 2012-12-06 I Several years ago when the Carter administration announced that it would support congressional action to end the public funding of abortions the President was asked at a press conference whether he thought that such a policy was unfair he responded Life is unfair His remarks provoked a storm of controversy For other than those who for principled reasons opposed abortion on any grounds it seemed that the President's comments were cruel violating what was thought to be an American commitment to providing equal access to health services to all citizens regardless of their capacity to pay Those sentiments had in fact been reflected in public opinion polls that had for at least three decades indicated that Americans supported the proposition that the government should guarantee health care to all Ultimately those beliefs had been translated into the oft expressed political demand for a one class system of health care This commitment to equality is rather remarkable American society evidences a striking willingness to tolerate vast inequalities with regard to income and wealth While it guarantees education to all children there is not even a pretense that the children of the wealthy and the children of the poor ought to get precisely the same kind of schooling While some commitment Hazel Erskine The Polls Health Insurance Public Opinion Quarterly XXXIX Spring 1975 128 143 **National Health Policy** Tanzania, 2002 **Hygie**, 1992 **DeLisa's Physical Medicine and Rehabilitation: Principles and Practice** Walter R. Saltman,1988-09-07 Provides a useful compendium of miscellaneous information on a large number of countries much of which is not usually available in English. The work is valuable in providing background for health statistics from different sources. As it shows common problems and widely varying approaches to solutions it is a useful research tool for comparative studies. ARBA The contributing authors provide basic information for starting to think about comparative issues in health care including system rationalization and managerial efficiency the expansion of primary and preventive care how best to channel the diffusion of increasingly intensive high technology machines and procedures how to resolve social inequities in the distribution of available health care resources spending on health care and its effect on infant mortality and population morbidity the structure of health care administration and health care financing. Each author provides not only a picture of the health system's current level of development but a description of the dynamic forces that drive the system's health care decision making processes and will determine its path in the future. The contributors highlight the unique historical cultural social political and or ideological factors that help to explain the structure that currently exists. The profiles are not themselves comparative in nature but the selected approach establishes a base from which a reader can make a wide variety of informed comparisons.
